

## DREYFUS TO BE FREE.

Even Now May Be Out of Prison.

### MINISTERS DECIDE ON PARDON.

It Was Reported In Rennes That He Had Already Been Released—May Be Sent Abroad—Fight Against Generals to Continue.

LONDON, Sept. 20.—The Rennes correspondent of The Daily Telegraph said in part: "There is reason to believe that Dreyfus is already out of prison."

PARIS, Sept. 20.—The pardoning of Captain Dreyfus does not drop the curtain on the drama. The Dreyfusards are determined to pursue the campaign against the generals and other officers of the general staff who have lied and committed gross illegalities in order to keep the prison door closed on the victim.

The campaign for his release has given the Socialist party a weapon of which they will avail themselves to the utmost, and Dreyfusism will be extended more into socialistic agitation. Moreover, the Zola trial and Mme. Henry's prosecution of Joseph Reinach for defaming the memory of her husband will shortly come on, and they will be used by both sides as levers again to excite public feeling.

Pardoning Dreyfus, therefore, only closes one act of the drama, and France will probably again find herself in the throes of party passion before the Paris exposition opens its doors next May.

The council of ministers decided to pardon Dreyfus in principle. The pardon will take effect in a few days. Dreyfus has relinquished his appeal for a reversal of the judgment of the court-martial.

"In principle" is an idiom sometimes used in the semi-official announcements of forthcoming action. It seems to have but slight bearing on the matter except, perhaps, that it implies the fulfillment of various formalities before the pardon.

There is much remark here on the strange coincidence of the death of M. Scheurer-Kestner, the first champion of Dreyfus, and to whom Dreyfus will virtually owe his freedom, on the very day the cabinet decided to pardon the prisoner.

It is said that Dreyfus will be sent abroad before the promulgation of his pardon in order to avoid demonstration.

## GUERIN SURRENDERED.

Ignominiously Carried Off to Prison. French Troops Were Ready For an Assault.

PARIS, Sept. 20.—According to agreement M. Guerin has surrendered.

Precisely at the hour appointed a captain of the municipal guards rapped at the door of Fort Chabrol. There was a moment of expectation and then the door opened. M. Guerin calmly presented himself, meekly surrendered and was driven to the police depot in an open cab, seated beside the captain of the guards. His companions were allowed to go free.

Thus the six weeks' siege ended in a sublimely ridiculous style.

The night was well chosen by the government, as the excitement over the capture of the fort would inevitably divert attention from the pardon extended to Dreyfus. The plan was to attack the building and arrest Guerin and his band. The government had given him until 4 o'clock to surrender and had a regular army to assault the fort if he refused. Troops, municipal guards, mounted and on foot, and policemen to the number of nearly 1,000, were dispatched to cordon all the streets within the radius of a quarter of a mile of Fort Chabrol.

The authorities had planned to flood Guerin's house with water.

### M. Scheurer-Kestner Dead.

PARIS, Sept. 20.—M. Scheurer-Kestner, the former vice president of the senate and champion of Dreyfus, is dead of typhoid fever.

### Admiral Montejó Put on Trial.

MADRID, Sept. 20.—The trial of Admiral Montejó, formerly chief in command of Spain's naval forces in the Philippines, who surrendered to Admiral Dewey after the destruction of the Spanish fleet in the battle of Cavite, began here. The prosecution demanded a sentence of imprisonment for life with dismissal from the service.

### Rev. Father Burke Dead.

SHAMOKIN, Pa., Sept. 20.—Rev. Father W. J. Burke of the Locust Gap Roman Catholic church died at the parsonage from heart failure. He was a graduate from St. Vincent's college, in Western Pennsylvania, and was ordained into the priesthood in 1886.

### To Argue In Behalf of Carter.

WASHINGTON, Sept. 20.—Wayne MacVeagh, counsel for Captain Carter of the engineer corps, reached Washington. In reply to questions, he said he would argue the case at the attorney general's convenience.

## YELLOW FEVER ALARMING.

About Thirty Cases a Day Developed at Key West—Mortality Low—New Case at New Orleans.

WASHINGTON, Sept. 20.—The yellow fever situation at Key West is regarded as grave. Since the first case was reported about three weeks ago the epidemic has been steadily growing until there are about 400 cases. New cases appeared at the rate of about 30 a day, but the mortality is low. Fifty-four cases and two deaths were reported for Sunday and Monday. Attendant Hall of the marine hospital staff developed the disease and he has been isolated. As Key West is situated below the frost line the epidemic will have to run its course. The marine hospital service has been directing its efforts to confining the epidemic to the island and has been rewarded with signal success.

Only one infected person is known to have escaped and he was discovered at Miami and isolated. He has since recovered.

The treatment of the cases in Key West is entirely under the supervision of the Florida state board of health. The marine hospital service is simply enforcing quarantine regulations with a view to preventing the spread of the disease.

One new case of fever was reported to the surgeon general from New Orleans.

### One Death; 31 New Cases.

KEY WEST, Sept. 20.—Thirty-one new cases of yellow fever were reported in 24 hours and one death.

## HANNA RETURNED HOME.

Talked on the Philippine War—Declared He Would Not Resign the Chairmanship.

CLEVELAND, Sept. 20.—Senator Hanna arrived home, and having made a brief visit to his office, went to his residence. Regarding the Philippine situation he had this to say:

"If some people believe that the mass of the people of the United States desire to give up what our soldiers and sailors fought for, they are much mistaken. Our soldiers are not now fighting the representative Filipinos, but the ruffian of the islands. In good time they will be given a protective government with just as much independence as they can handle."

Asked whether he thought Roosevelt would be a candidate for the presidential nomination, he said:

"I cannot express my definite opinion now, but Hobart and McKinley are the logical candidates."

Senator Hanna said he had no intention of relinquishing the chairmanship of the Republican national executive committee before his term expires.

## AN IMPORTANT DECISION.

Judge Williams Holds Stockholders' Property May Be Attached to Enforce Statutory Liability.

COLUMBUS, Sept. 20.—Judge O. C. Williams of the chancery court in a decision held that attachment may be made on property of the stockholders of a company to enforce the statutory liability. The decision was rendered in overruling a motion by B. A. Hough and Henry W. Puhm, brokers of New York, who sought to dissolve an attachment suit brought against them by the Dayton Manufacturing company on the ground that they are non-residents of Ohio, and statutory liability is not a proper claim to be collected by attachment.

The decision of Judge Williams affects New York parties holding about \$3,000,000 of the stock of the old Columbus, Shawnee and Hocking Railroad company.

### TROUBLE IN THE AMALGAMATED.

Men Dissatisfied With Scale and May Be a Split.

YOUNGSTOWN, O., Sept. 20.—Dissatisfaction over wages among the Amalgamated Association of Iron, Steel and Tin workers may cause a split in that organization. The men are dissatisfied over the recent settlement of wages at the bi-monthly meeting of the representatives of the association, who decided to let wages remain as they are for the next two months. The puddlers claim the puddling rate should have been advanced from \$5 to \$6 and better.

Puddlers are talking of withdrawing from the association at once and there is to be a meeting of those interested in Pittsburgh next Saturday night, when 600 millworkers of the Amalgamated association will be present and discuss what action shall be taken.

### Want Hunter Removed.

NEW ORLEANS, Sept. 20.—American citizens in Central America have signed a "round robin" against United States Minister Hunter. They are especially enraged over his action in the Peas case.

### Detroit Reached La Guayra.

WASHINGTON, Sept. 20.—The cruiser Detroit reported her arrival at La Guayra, Venezuela, where she was sent to look after American interests.

## PROPOSAL OF REBELS.

Cabinet Officials Don't Expect Much to Result.

### ROOT IS NOT VERY SANGUINE.

The Rebels Proposed That a General Be Admitted Through Our Lines—The Request Granted—Also Offered to Send In American Prisoners.

WASHINGTON, Sept. 20.—Three members of the cabinet, alluding to General Otis's dispatch regarding a conference with the insurgents, agreed, after the meeting of the cabinet, during which the dispatch was considered, in expressing the opinion that too much significance should not be attached to Aguinaldo's proposal. Secretary Root himself said that so many similar conferences in the past had come to naught that he doubted very much whether this one meant anything toward the establishment of peace and good order in the islands.

The text of the dispatch as made public by the war department is as follows:

MANILA, Sept. 19.

Adjutant General, Washington:

MacArthur reports from Angeles visit of two insurgent officers with request for permission to send into our lines American prisoners and to send to Manila prominent insurgent general officer for conference. The requested interview granted and insurgent officers at Angeles return north this morning with information.

The protest of the Chinese government against General Otis' order excluding the Chinese from the Philippines is said not to have come up at the cabinet meeting.

The war department approved the action of General Otis in refusing to allow Spanish ships to go to ports controlled by the insurgents to take away Spanish prisoners. These ships, however, will be allowed to proceed to such ports under the escort of vessels of the United States. The transfer of the Spanish prisoners to the ships will be under the direction and control of United States officers. The war department will allow no communication between Aguinaldo and his agents and the Spaniards who may go to bring away the Spanish prisoners.

While no names were mentioned in the dispatch from Otis it is inferred that included in the list of American prisoners to whom the negotiations relate is Lieutenant Gilmore and the 15 men of the Yorktown who were captured by the insurgents on the east coast of Luzon, Major Rockefeller, who was captured beyond the American lines one night shortly after his arrival in the Philippines and half a dozen private soldiers who have been reported as passing.

## PRELATES DIDN'T PROTEST.

Catholic Dignitaries Consider Desecration of Philippine Churches Work of Mere Lawless Persons.

WASHINGTON, Sept. 20.—President McKinley recently received a protest against the alleged desecration of Catholic church property in the Philippines, submitted by an organization called the Metropolitan Truth society.

The regular church authorities have taken no action relative to the Philippines, as this has never been submitted to their jurisdiction. Moreover, they have observed with satisfaction that the archbishop of Manila has co-operated with the military administration, one of the latest evidences of this co-operation being the issuance of a decree including the Catholic church holidays among those to be observed in the public schools. The reported desecrations have been treated as the work of lawless individuals, having no countenance with the commanding officers. In case of an authoritative protest it would be doubtless made through the archbishop of Manila or through the apostolic delegate. No reports of desecrations have ever come from these sources.

### Engagement With Rebels.

WASHINGTON, Sept. 20.—The navy department received the following cablegram from Admiral Watson, dated Manila, Sept. 19: "Davidson, in Paragua, had sharp engagement on the 14th at San Fabian, Lingayen gulf, with about 300 insurgents heavily entrenched at a distance of 1,100 to 1,700. The insurgents fled. Their fire was weak and ineffective. On the Paragua there were no casualties. The senior commands Davidson highly."

### Lieutenant Colonel Miley Dead.

WASHINGTON, Sept. 20.—Lieutenant Colonel John D. Miley, inspector general of volunteers, died at Manila. The information reached the war department in a cablegram from General Otis. His death was due to cerebral meningitis attendant on typhoid fever. Colonel Miley's rank in the regular army was first lieutenant Second artillery.

### Tailors on a Strike.

TOLEDO, Sept. 20.—Every union tailor in Toledo went out on a strike except four in one shop. The men are making a fight for an increase in the price of piece work, amounting to about 25 per cent.

## ALMOST A CATASTROPHE.

Details of Sinking of U. S. Transport. Fine Discipline, but Poor Seaman-ship—Kindness of Japs.

YOKOHAMA, Sept. 8, via Victoria, B. C., Sept. 20.—Interesting details are at hand of the wreck of the American transport Morgan City, in the inland sea of Japan. It appears that it came very near being an appalling catastrophe. Striking upon a reef about 3 o'clock in the morning, the ship remained fast until daylight, when, by adopting the expedient of pushing the men alternately from one side to the other, the ship was rolled from the rocks into deep water, where she at once began to fill rapidly.

She headed for the shore of the island of Inoshima, several miles distant, sinking perceptibly with every yard of progress. She reached the beach barely a minute before otherwise going under. The discipline of the men was admirable, and all were gotten ashore in safety. The seamanship shown appears not to have been so admirable, as no precautions were taken to make the boat fast to the shore after beaching. Time was spent in removing stores, the transport lying very nearly bows under, but afloat in the after part. In the afternoon, without warning, she slid off the steep beach and sank in about six fathoms.

Almost instantly came aid from the Japanese authorities, the cruiser Yosehomo being at once dispatched and the Red Cross society sending an expedition. The troops are loud in their appreciation of Japanese kindness.

A pleasant episode of the shipwrecked men was the passing of the Empress of India, which stopped for some hours and proffered everything which could be done in the way of aid.

### LAUTERBACH AND MOSS.

They Had Several Rows When Former Was Before Mazet Committee.

NEW YORK, Sept. 20.—Edward Lauterbach, counsel for the Ramapo company, was on the stand before the Mazet committee. He was asked to tell whether the Ramapo stockholders had decided to submit a list of their names. Mr. Lauterbach stated that he had been instructed not to submit the list on any other terms than those previously named, which were that the names should not be made public.

Mr. Lauterbach and Mr. Moss had several wordy rows during the examination. The witness said he would much rather see a Tammany man elected mayor than a man who belonged to no organization. Later, he was given an opportunity to explain his "pro-Tammany" speech, as he called it. He said that his words merely expressed a preference for an organization nomination, even by a hostile organization, to a hybrid one.

Silas B. Dutcher, president of the Ramapo company, who was called to the stand, declared that he had no such documents as he had been called upon to produce before the committee. Mr. Dutcher declined to answer a number of questions put to him, and was unable to say where the books of the company were.

### ODD FELLOWS CHOSE RICHMOND.

Selected as Next Place of Meeting of Sovereign Grand Lodge.

DETROIT, Sept. 20.—The grand lodge of Ohio presented the sovereign grand lodge with a cane which has a strong sentimental interest for Odd Fellows. It belonged to Thomas Wiltie, founder of the order in this county.

Richmond was chosen as the place of meeting in 1900.

The Rebekah assembly tendered Grand Sire Pinkerton and the various department commanders a reception in Light infantry armory.

Last night's feature was a reunion of past grand representatives. One of the speakers was J. C. Farnham of Ohio, who read an address on "Progressive Oddfellowship."

The I. O. O. F. International Press association elected Mrs. Eunice Melville of Indianapolis president and John Burlette of Concord secretary and treasurer.

### Blind Strikers Returned to Work.

PHILADELPHIA, Sept. 20.—After a strike lasting 16 weeks the blind broom-makers, who had not previously done so, returned to their work at the Pennsylvania Working Home for Blind Men. There were 59 of them, the other 59 having previously gone back. The blind men were granted an increase in wages. Superintendent Hall, whom they wanted discharged, is retained pending an investigation of the charges against him.

### Some Discharged, Others Arrested.

CARTERVILLE, Ills., Sept. 20.—Matters here were very quiet here. The coroner's jury is still in session and may be for two or three days yet. Company B of Newton arrived. About 50 Carterville people were summoned to Marion as witnesses in behalf of the 19 union miners under arrest there. After hearing a few witnesses all the prisoners were discharged. Deputy Sheriff Odum of Marion made nine arrests for complicity in the shooting Sunday.

### Soldier's Death Reported.

WASHINGTON, Sept. 20.—Gen. Brooke reported to the war department the death of Private Bob Roberts, Company M, Tenth cavalry, who was killed by a fall at Canto, Santiago, on the 16th inst.

## SALISBURY IS CALM.

Meanwhile Troops Are Rushing to South Africa.

### CABINET MEETING ON FRIDAY.

England's Quiet Attitude Considered In European Capitals as Being Assumed to Cause Delay Until Troops Arrive. Alarm In Natal Declared Unwarranted.

LONDON, Sept. 20.—Summonses were issued for a cabinet council, which, it is understood, will be held Friday. This is regarded as the result of the visit of the premier, Lord Salisbury, to the foreign office. Joseph Chamberlain, the secretary of state for the colonies, was present in the building at the same time, and as a private doorway connects the offices it was presumed that the summonses were the result of their joint deliberations.

The lack of all excitement in official circles bears evidence to the deliberate manner in which the highest officials are handling the crisis. Nor is it by any means certain that the cabinet council will adopt extreme measures, in spite of the uncompromising nature of the Boer reply.

This deliberation on the part of the government was interpreted, not only in London but in other European capitals, as a desire on the part of Great Britain to gain time while the transports with soldiers are hurrying to Cape Colony.

Even rumors of a movement of the Boers across the Natal border apparently fail to excite the military authorities here, who professed at least not to fear such a contingency for the present.

The royal West Sussex regiment left for Malta, where it will replace the First border regiment, which goes by the same steamer to Natal.

The British first class protected cruisers Terrible and Powerful were ordered to the Cape. They have reliefs on board capable of forming a naval brigade of 1,000 men.

The steamer Jelunga will take 500 troops bound for Natal today, and she will embark a rifle brigade at the island of Crete for the Cape.

According to a dispatch from Durban, Natal, the premier of the colony says that the alarm of the people of Natal at the unprotected conditions of the border towns is quite unwarranted, and that efforts to incite the Zulus failed.

The lull in the crisis gives opportunity for the continuance of unofficial negotiations. The government of the Netherlands is privately exerting its influence in favor of a pacific solution, and it is understood that President Kruger, through Dr. Leyds, the plenipotentiary of the South African republic to the European governments, has unofficially approached three powers with a view to their intervention.

Sir Alfred Milner has addressed further inquiries to President Steyn of the Orange Free State. Whatever the official attitude of the Orange Free State may be, the temper of its burghers, judging from numerous meetings held in Bloemfontein and elsewhere, is to assist the Transvaal actively.

The Free State commandant in Pretoria are discussing the position with the Transvaal commandant general, and the meeting of the Free State Volksraad tomorrow will have an important influence on the situation.

A curious rumor is spreading in the lower ranks of the army that Great Britain will be involved with Afghanistan as well as the Transvaal.

The correspondent of The Daily Mail at Pietermaritzburg, Natal, telegraphs that the military authorities there have received a warning from Johannesburg that the Boers have purchased considerable quantities of cyanide of potassium for the purpose of poisoning the streams in the Transvaal likely to be used by British troops.

Other special dispatches report various details of preparations for war on both sides.

## PRIVATE HOON'S OFFENSE.

Forged Names to Petition Asking Otis to Allow Him to Pass Examination For Promotion.

WASHINGTON, Sept. 20.—Secretary Root sent the following letter to Governor Bushnell of Ohio:

"Your letter of Sept. 14 to the president, enclosing a letter from Lawrence F. Hoon, relating to his conviction by court-martial in the Philippine islands, has been referred to me for reply:

"I have the honor to inclose a copy of a dispatch from General Otis, by which you will see that the young man was regularly tried and convicted for attempting to secure promotion by means of a petition upon which he forged the names of six non-commissioned officers and privates of his company; that the trial was at the instance of his regimental commander, and that the sentence was approved by General Lawton."

### Schley to Attend Dewey Dinner.

WASHINGTON, Sept. 20.—Admiral Schley will go to New York as a private citizen to attend the Dewey celebration and will return here in time to be one of the guests at the president's dinner to Admiral Dewey on the night of October 3.

## MINISTERS DECIDE ON PARDON.

It Was Reported in Rennes That He Had Already Been Released—May Be Sent Abroad—Fight Against Generals to Continue.

LONDON, Sept. 20.—The Rennes correspondent of The Daily Telegraph said in part:

She headed for the shore of the island of Inoshima, several miles distant, sinking perceptibly with every yard of progress. She reached the beach barely a minute before otherwise going under. The discipline of the men was admirable, and all were gotten ashore in safety. The seamanship shown appears not to have been so admirable, as no precautions were taken to make the boat fast to the shore after beaching. Time was spent in removing stores, the transport lying very nearly bows under, but afloat in the after part. In the afternoon, without warning, she slid off the steep beach and sank in about six fathoms.

Almost instantly came aid from the Japanese authorities, the cruiser Yosehomo being at once dispatched and the Red Cross society sending an expedition. The troops are loud in their appreciation of Japanese kindness.

A pleasant episode of the shipwrecked men was the passing of the Empress of India, which stopped for some hours and proffered everything which could be done in the way of aid.

## LAUTERBACH AND MOSS.

They Had Several Rows When Former Was Before Mazet Committee.

NEW YORK, Sept. 20.—Edward Lauterbach, counsel for the Ramapo company, was on the stand before the Mazet committee. He was asked to tell whether the Ramapo stockholders had decided to submit a list of their names. Mr. Lauterbach stated that he had been instructed not to submit the list on any other terms than those previously named, which were that the names should not be made public.

Mr. Lauterbach and Mr. Moss had several words when the examination. The witness said he would much rather see a Tammany man elected mayor than a man who belonged to no organization. Later, he was given an opportunity to explain his "pro-Tammany" speech, as he called it. He said that his words merely expressed a preference for an organization nomination, even by a hostile organization, to a hybrid one.

Silas B. Dutcher, president of the Ramapo company, who was called to the stand, declared that he had no such documents as he had been called upon to produce before the committee. Mr. Dutcher declined to answer a number of questions put to him, and was unable to say where the books of the company were.

## ODD FELLOWS CHOSE RICHMOND.

Selected as Next Place of Meeting of Sovereign Grand Lodge.

DETROIT, Sept. 20.—The grand lodge of Ohio presented the sovereign grand lodge with a cane which has a strong sentimental interest for Odd Fellows. It belonged to Thomas Wiltie, founder of the order in this county.

Richmond was chosen as the place of meeting in 1900.

The Rebekah assembly tendered Grand Sire Pinkerton and the various department commanders a reception in Light infantry armory.

Last night's feature was a reunion of past grand representatives. One of the speakers was J. C. Farnham of Ohio, who read an address on "Progressive Oddfellowship."

The I. O. O. F. International Press association elected Mrs. Eunice Melville of Indianapolis president and John Burlette of Concord secretary and treasurer.

## Blind Strikers Returned to Work.

PHILADELPHIA, Sept. 20.—After a strike lasting 16 weeks the blind broom-makers, who had not previously done so, returned to their work at the Pennsylvania Working Home for Blind Men. There were 59 of them, the other 59 having previously gone back. The blind men were granted an increase in wages. Superintendent Hall, whom they wanted discharged, is retained pending an investigation of the charges against him.

## Some Discharged, Others Arrested.

CARTERVILLE, Ill., Sept. 20.—Matters have been very quiet here. The coroner's jury is still in session and may be for two or three days yet. Company B of Newton arrived. About 50 Carterville people were summoned to Marion as witnesses in behalf of the 19 union miners under arrest there. After hearing a few witnesses all the prisoners were discharged. Deputy Sheriff Odum of Marion made nine arrests for complicity in the shooting Sunday.

## Soldier's Death Reported.

WASHINGTON, Sept. 20.—Gen. Brooke reported to the war department the death of Private Bob Roberts, Company M, Tenth cavalry, who was killed by a fall at Canto, Santiago, on the 16th inst.

## SALISBURY IS CALM.

Meanwhile Troops Are Rushing to South Africa.

## CABINET MEETING ON FRIDAY.

England's Quiet Attitude Considered in European Capitals as Being Assumed to Cause Delay Until Troops Arrive. Alarm in Natal Declared Unwarranted.

LONDON, Sept. 20.—Summonses were issued for a cabinet council, which, it is understood, will be held Friday. This is regarded as the result of the visit of the premier, Lord Salisbury, to the foreign office. Joseph Chamberlain, the secretary of state for the colonies, was present in the building at the same time, and as a private doorway connects the offices it was presumed that the summonses were the result of their joint deliberations.

The lack of all excitement in official circles bears evidence to the deliberate manner in which the highest officials are handling the crisis. Nor is it by any means certain that the cabinet council will adopt extreme measures, in spite of the uncompromising nature of the Boer reply.

This deliberation on the part of the government was interpreted, not only in London but in other European capitals, as a desire on the part of Great Britain to gain time while the transports with soldiers are hurrying to Cape Colony.

Even rumors of a movement of the Boers across the Natal border apparently fail to excite the military authorities here, who professed at least not to fear such a contingency for the present.

The royal West Sussex regiment left for Malta, where it will replace the First border regiment, which goes by the same steamer to Natal.

The British first class protected cruisers Terrible and Powerful were ordered to the Cape. They have reliefs on board capable of forming a naval brigade of 1,000 men.

The steamer Jelunga will take 500 troops bound for Natal today, and she will embark a rifle brigade at the island of Crete for the Cape.

According to a dispatch from Durban, Natal, the premier of the colony says that the alarm of the people of Natal at the unprotected conditions of the border towns is quite unwarranted, and that efforts to incite the Zulus failed.

The lull in the crisis gives opportunity for the continuance of unofficial negotiations. The government of the Netherlands is privately exerting its influence in favor of a pacific solution, and it is understood that President Kruger, through Dr. Leyds, the plenipotentiary of the South African republic to the European governments, has unofficially approached three powers with a view to their intervention.

Sir Alfred Milner has addressed further inquiries to President Steyn of the Orange Free State. Whatever the official attitude of the Orange Free State may be, the temper of its burghers, judging from numerous meetings held in Bloemfontein and elsewhere, is to assist the Transvaal actively.

The Free State commandant in Pretoria are discussing the position with the Transvaal commandant general, and the meeting of the Free State volksraad tomorrow will have an important influence on the situation.

A curious rumor is spreading in the lower ranks of the army that Great Britain will be involved with Afghanistan as well as the Transvaal.

The correspondent of The Daily Mail at Pietermaritzburg, Natal, telegraphs that the military authorities there have received a warning from Johannesburg that the Boers have purchased considerable quantities of cyanide of potassium for the purpose of poisoning the streams in the Transvaal likely to be used by British troops.

Other special dispatches report various details of preparations for war on both sides.

## PRIVATE HOON'S OFFENSE.

Forged Names to Petition Asking Otis to Allow Him to Pass Examination For Promotion.

WASHINGTON, Sept. 20.—Secretary Root sent the following letter to Governor Bushnell of Ohio:

"Your letter of Sept. 14 to the president, enclosing a letter from Lawrence F. Hoon, relating to his conviction by court-martial in the Philippine islands, has been referred to me for reply:

"I have the honor to inclose a copy of a dispatch from General Otis, by which you will see that the young man was regularly tried and convicted for attempting to secure promotion by means of a petition upon which he forged the names of six non-commissioned officers and privates of his company; that the trial was at the instance of his regimental commander, and that the sentence was approved by General Lawton."

## Schley to Attend Dewey Dinner.

WASHINGTON, Sept. 20.—Admiral Schley will go to New York as a private citizen to attend the Dewey celebration and will return here in time to be one of the guests at the president's dinner to Admiral Dewey on the night of October 3.

15TH YEAR. NO. 87.

EAST LIVERPOOL, O., WEDNESDAY, SEPT. 20, 1899.

TWO CENTS

## DREYFUS TO BE FREE.

Even Now May Be Out of Prison.

### MINISTERS DECIDE ON PARDON.

It Was Reported in Rennes That He Had Already Been Released—May Be Sent Abroad—Fight Against Generals to Continue.

LONDON, Sept. 20.—The Rennes correspondent of The Daily Telegraph said in part:

"There is reason to believe that Dreyfus is already out of prison."

PARIS, Sept. 20.—The pardoning of Captain Dreyfus does not drop the curtain on the drama. The Dreyfusards are determined to pursue the campaign against the generals and other officers of the general staff who have lied and committed gross illegalities in order to keep the prison door closed on the victim.

The campaign for his release has given the Socialist party a weapon of which they will avail themselves to the utmost, and Dreyfusism will be extended more into socialistic agitation. Moreover, the Zola trial and Mme. Henry's prosecution of Joseph Reinach for defaming the memory of her husband will shortly come on, and they will be used by both sides as levers again to excite public feeling.

Pardoning Dreyfus, therefore, only closes one act of the drama, and France will probably again find herself in the throes of party passion before the Paris exposition opens its doors next May.

The council of ministers decided to pardon Dreyfus in principle. The pardon will take effect in a few days. Dreyfus has relinquished his appeal for a reversal of the judgment of the court-martial.

"In principle" is an idiom sometimes used in the semi-official announcements of forthcoming action. It seems to have but slight bearing on the matter except, perhaps, that it implies the fulfillment of various formalities before the pardon.

There is much remark here on the strange coincidence of the death of M. Scheurer-Kestner, the first champion of Dreyfus, and to whom Dreyfus will virtually owe his freedom, on the very day the cabinet decided to pardon the prisoner.

It is said that Dreyfus will be sent abroad before the promulgation of his pardon in order to avoid demonstration.

## GUERIN SURRENDERED.

Ignominiously Carried Off to Prison. French Troops Were Ready For an Assault.

PARIS, Sept. 20.—According to agreement M. Guerin has surrendered.

Precisely at the hour appointed a captain of the municipal guards rapped at the door of Fort Chabrol. There was a moment of expectation and then the door opened. M. Guerin calmly presented himself, meekly surrendered and was driven to the police depot in an open cab, seated beside the captain of the guards. His companions were allowed to go free.

Thus the six weeks' siege ended in a sublimely ridiculous style.

The night was well chosen by the government, as the excitement over the capture of the fort would inevitably divert attention from the pardon extended to Dreyfus. The plan was to attack the building and arrest Guerin and his band. The government had given him until 4 o'clock to surrender and had a regular army to assault the fort if he refused. Troops, municipal guards, mounted and on foot, and policemen to the number of nearly 1,000, were dispatched to cordon all the streets within the radius of a quarter of a mile of Fort Chabrol.

The authorities had planned to flood Guerin's house with water.

### M. Scheurer-Kestner Dead.

PARIS, Sept. 20.—M. Scheurer-Kestner, the former vice president of the senate and champion of Dreyfus, is dead of typhoid fever.

### Admiral Montejó Put on Trial.

MADRID, Sept. 20.—The trial of Admiral Montejó, formerly chief in command of Spain's naval forces in the Philippines, who surrendered to Admiral Dewey after the destruction of the Spanish fleet in the battle of Cavite, began here. The prosecution demanded a sentence of imprisonment for life with dismissal from the service.

### Rev. Father Burke Dead.

SHAMOKIN, Pa., Sept. 20.—Rev. Father W. J. Burke of the Locust Gap Roman Catholic church died at the parsonage from heart failure. He was a graduate of St. Vincent's college, in Western Pennsylvania, and was ordained into the priesthood in 1886.

### To Argue in Behalf of Carter.

WASHINGTON, Sept. 20.—Wayne MacVeagh, counsel for Captain Carter of the engineer corps, reached Washington. In reply to questions, he said he would argue the case at the attorney general's convenience.

## YELLOW FEVER ALARMING.

About Thirty Cases a Day Developed at Key West—Mortality Low—New Case at New Orleans.

WASHINGTON, Sept. 20.—The yellow fever situation at Key West is regarded as grave. Since the first case was reported about three weeks ago the epidemic has been steadily growing until there are about 400 cases. New cases appeared at the rate of about 30 a day, but the mortality is low. Fifty-four cases and two deaths were reported for Sunday and Monday. Attendant Hall of the marine hospital staff developed the disease and he has been isolated. As Key West is situated below the frost line the epidemic will have to run its course. The marine hospital service has been directing its efforts to confining the epidemic to the island and has been rewarded with signal success.

Only one infected person is known to have escaped and he was discovered at Miami and isolated. He has since recovered.

The treatment of the cases in Key West is entirely under the supervision of the Florida state board of health. The marine hospital service is simply enforcing quarantine regulations with a view to preventing the spread of the disease.

One new case of fever was reported to the surgeon general from New Orleans.

### One Death; 31 New Cases.

KEY WEST, Sept. 20.—Thirty-one new cases of yellow fever were reported in 24 hours and one death.

## HANNA RETURNED HOME.

Talked on the Philippine War—Declared He Would Not Resign the Chairmanship.

CLEVELAND, Sept. 20.—Senator Hanna arrived home, and having made a brief visit to his office, went to his residence. Regarding the Philippine situation he had this to say:

"If some people believe that the mass of the people of the United States desire to give up what our soldiers and sailors fought for, they are much mistaken. Our soldiers are not now fighting the representative Filipinos, but the ruffian of the islands. In good time they will be given a protective government with just as much independence as they can handle."

Asked whether he thought Roosevelt would be a candidate for the presidential nomination, he said:

"I cannot express my definite opinion now, but Hobart and McKinley are the logical candidates."

Senator Hanna said he had no intention of relinquishing the chairmanship of the Republican national executive committee before his term expires.

## AN IMPORTANT DECISION.

Judge Williams Holds Stockholders' Property May Be Attached to Enforce Statutory Liability.

COLUMBUS, Sept. 20.—Judge O. C. Williams of the chancery court in a decision held that attachment may be made on property of the stockholders of a company to enforce the statutory liability. The decision was rendered in overruling a motion by B. A. Hough and Henry W. Puhm, brokers of New York, who sought to dissolve an attachment suit brought against them by the Dayton Manufacturing company on the ground that they are non-residents of Ohio, and statutory liability is not a proper claim to be collected by attachment.

The decision of Judge Williams affects New York parties holding about \$3,000,000 of the stock of the old Columbus, Shawnee and Hocking Railroad company.

## TROUBLE IN THE AMALGAMATED.

Men Dissatisfied With Scale and May Be a Split.

YOUNGSTOWN, O., Sept. 20.—Dissatisfaction over wages among the Amalgamated Association of Iron, Steel and Tin workers may cause a split in that organization. The men are dissatisfied over the recent settlement of wages at the bi-monthly meeting of the representatives of the association, who decided to let wages remain as they are for the next two months. The puddlers claim the puddling rate should have been advanced from \$5 to \$6 and better.

Puddlers are talking of withdrawing from the association at once and there is to be a meeting of those interested in Pittsburgh next Saturday night, when 600 millworkers of the Amalgamated association will be present and discuss what action shall be taken.

### Want Hunter Removed.

NEW ORLEANS, Sept. 20.—American citizens in Central America have signed a "round robin" against United States Minister Hunter. They are especially enraged over his action in the Peas case.

### Detroit Reached La Guayra.

WASHINGTON, Sept. 20.—The cruiser Detroit reported her arrival at La Guayra, Venezuela, where she was sent to look after American interests.

## PROPOSAL OF REBELS.

Cabinet Officials Don't Expect Much to Result.

### ROOT IS NOT VERY SANGUINE.

The Rebels Proposed That a General Be Admitted Through Our Lines—The Request Granted—Also Offered to Send In American Prisoners.

WASHINGTON, Sept. 20.—Three members of the cabinet, alluding to General Otis's dispatch regarding a conference with the insurgents, agreed, after the meeting of the cabinet, during which the dispatch was considered, in expressing the opinion that too much significance should not be attached to Aguinaldo's proposal. Secretary Root himself said that so many similar conferences in the past had come to naught that he doubted very much whether this one meant anything toward the establishment of peace and good order in the islands.

The text of the dispatch as made public by the war department is as follows:

MANILA, Sept. 19.

Adjutant General, Washington: MacArthur reports from Angeles visit of two insurgent officers with request for permission to send into our lines American prisoners and to send to Manila prominent insurgent general officer for conference. The requested interview granted and insurgent officers at Angeles return north this morning with information.

The protest of the Chinese government against General Otis' order excluding the Chinese from the Philippines is said not to have come up at the cabinet meeting.

The war department approved the action of General Otis in refusing to allow Spanish ships to go to ports controlled by the insurgents to take away Spanish prisoners. These ships, however, will be allowed to proceed to such ports under the escort of vessels of the United States. The transfer of the Spanish prisoners to the ships will be under the direction and control of United States officers. The war department will allow no communication between Aguinaldo and his agents and the Spaniards who may go to bring away the Spanish prisoners.

While no names were mentioned in the dispatch from Otis it is inferred that included in the list of American prisoners to whom the negotiations relate is Lieutenant Gilmore and the 15 men of the Yorktown who were captured by the insurgents on the east coast of Luzon, Major Rockefeller, who was captured beyond the American lines one night shortly after his arrival in the Philippines and half a dozen private soldiers who have been reported as missing.

## PRELATES DIDN'T PROTEST.

Catholic Dignitaries Consider Desecration of Philippine Churches Work of Mere Lawless Persons.

WASHINGTON, Sept. 20.—President McKinley recently received a protest against the alleged desecration of Catholic church property in the Philippines, submitted by an organization called the Metropolitan Truth society.

The regular church authorities have taken no action relative to the Philippines, as this has never been submitted to their jurisdiction. Moreover, they have observed with satisfaction that the archbishop of Manila has co-operated with the military administration, one of the latest evidences of this co-operation being the issuance of a decree including the Catholic church holidays among those to be observed in the public schools. The reported desecrations have been treated as the work of lawless individuals, having no countenance with the commanding officers. In case of an authoritative protest it would be doubtless made through the archbishop of Manila or through the apostolic delegate. No reports of desecrations have ever come from these sources.

### Engagement With Rebels.

WASHINGTON, Sept. 20.—The navy department received the following cablegram from Admiral Watson, dated Manila, Sept. 19: "Davidson, in Paragua, had sharp engagement on the 14th at San Fabian, Lingayen gulf, with about 300 insurgents heavily entrenched at a distance of 1,100 to 1,700. The insurgents fled. Their fire was weak and ineffective. On the Paragua there were no casualties. The senior commands Davidson highly."

### Lieutenant Colonel Miley Dead.

WASHINGTON, Sept. 20.—Lieutenant Colonel John D. Miley, inspector general of volunteers, died at Manila. The information reached the war department in a cablegram from General Otis. His death was due to cerebral meningitis attendant on typhoid fever. Colonel Miley's rank in the regular army was first lieutenant Second artillery.

### Tailors on a Strike.

TOLEDO, Sept. 20.—Every union tailor in Toledo went out on a strike except four in one shop. The men are making a fight for an increase in the price of piece work, amounting to about 25 per cent.

## ALMOST A CATASTROPHE.

Details of Sinking of U. S. Transport. Fine Discipline, but Poor Seaman-ship—Kindness of Japs.

YOKOHAMA, Sept. 8, via Victoria, B. C., Sept. 20.—Interesting details are at hand of the wreck of the American transport Morgan City, in the inland sea of Japan. It appears that it came very near being an appalling catastrophe. Striking upon a reef about 3 o'clock in the morning, the ship remained fast until daylight, when, by adopting the expedient of pushing the men alternately from one side to the other, the ship was rolled from the rocks into deep water, where she at once began to fill rapidly.

She headed for the shore of the island of Inoshima, several miles distant, sinking perceptibly with every yard of progress. She reached the beach barely a minute before otherwise going under. The discipline of the men was admirable, and all were gotten ashore in safety. The seamanship shown appears not to have been so admirable, as no precautions were taken to make the boat fast to the shore after beaching. Time was spent in removing stores, the transport lying very nearly bows under, but afloat in the after part. In the afternoon, without warning, she slid off the steep beach and sank in about six fathoms.

Almost instantly came aid from the Japanese authorities, the cruiser Yosehomo being at once dispatched and the Red Cross society sending an expedition. The troops are loud in their appreciation of Japanese kindness.

Mr. Dutcher declined to answer a number of questions put to him, and was unable to say where the books of the company were.

### CABINET MEETING ON FRIDAY.

England's Quiet Attitude Considered in European Capitals as Being Assumed to Cause Delay Until Troops Arrive. Alarm in Natal Declared Unwarranted.

LONDON, Sept. 20.—Summonses were issued for a cabinet council, which, it is understood, will be held Friday. This is regarded as the result of the visit of the premier, Lord Salisbury, to the foreign office. Joseph Chamberlain, the secretary of state for the colonies, was present in the building at the same time, and as a private doorway connects the offices it was presumed that the summonses were the result of their joint deliberations.

The lack of all excitement in official circles bears evidence to the deliberate manner in which the highest officials are handling the crisis. Nor is it by any means certain that the cabinet council will adopt extreme measures, in spite of the uncompromising nature of the Boer reply.

This deliberation on the part of the government was interpreted, not only in London but in other European capitals, as a desire on the part of Great Britain to gain time while the transports with soldiers are hurrying to Cape Colony.

Even rumors of a movement of the Boers across the Natal border apparently fail to excite the military authorities here, who professed at least not to fear such a contingency for the present.

A curious rumor is spreading in the lower ranks of the army that Great Britain will be involved with Afghanistan as well as the Transvaal.

The correspondent of The Daily Mail at Pietermaritzburg, Natal, telegraphs that the military authorities there have received a warning from Johannesburg that the Boers have purchased considerable quantities of cyanide of potassium for the purpose of poisoning the streams in the Transvaal likely to be used by British troops.

Other special dispatches report various details of preparations for war on both sides.

## PRIVATE HOON'S OFFENSE.

Forged Names to Petition Asking Otis to Allow Him to Pass Examination For Promotion.

WASHINGTON, Sept. 20.—Secretary Root sent the following letter to Governor Bushnell of Ohio:

"Your letter of Sept. 14 to the president, enclosing a letter from Lawrence F. Hoon, relating to his conviction by court-martial in the Philippine islands, has been referred to me for reply:

"I have the honor to inclose a copy of a dispatch from General Otis, by which you will see that the young man was regularly tried and convicted for attempting to secure promotion by means of a petition upon which he forged the names of six non-commissioned officers and privates of his company; that the trial was at the instance of his regimental commander, and that the sentence was approved by General Lawton."

IN starting a season, which we certainly expect to eclipse any of its predecessors, it may be appropriate to explain our confidence and enthusiasm.

Every suit and top coat in our house this season <sup>HAS BEEN</sup> made to our order, every yard of cloth has been sponged, every garment has been cut, made, pressed by skilled Union Labor. Each individual article has been finished with the same degree of care, and upon the same scale of excellence as the best merchant tailoring.

Rip an Erlanger fall 1899 garment, you'll find the extra hair cloth, you'll discover additional stays, you'll recognize that the good points of reliable clothing are not all on the outside.

True the innovation is somewhat costly, for hair cloth, stays, stitching, labor are not furnished to us free, but the results are expected to justify the investment.

### ARE FOUR MONTHS LATE

Much Time Has Been Lost In Mill Construction.

### RAILROAD COMPANY AT FAULT

Said Extension Would Be Completed In August—County Superintendent Allison In Chester Yesterday—Another Slide at the Narrows Last Night.

The Chester Rolling Mill company are making all possible haste in the erection of their mill, but the officers are somewhat discouraged about having the mill in operation by the first of the year, as was expected when work was first started.

One of the officers of the company when seen this morning said: "No, we will be four months late in starting the mill. When we started work the railroad company said the extension would be completed by August, but they have failed to keep their promise. Four months' running now, the way business is, is worth a year's running when business is just ordinary. As it is at present we are losing money right along. We should be in operation now."

"We had a good offer from McDonald to locate there at the same time we were considering this site and were looking with favor upon it. Had we built then we would have been running by this time."

### ARE SATISFIED.

Railroad Company Make No Complaint About Court's Decisions.

Attorney Somerville, of Wheeling, during his recent visit to Chester said it would not be known definitely whether or not the property owners who had contested in court the condemnation of their property would appeal from the decisions of the commissioners until the fall term of the court opens. He thinks the decisions are satisfactory to the railroad company.

### ANOTHER SLIDE.

Much Earth Caved In at the Narrows During the Night.

The rain of yesterday caused about 300 tons of earth to cave in at the narrows during the night, and for several days the work of grading will be discontinued. A large force of men are now at work cleaning the roadway.

### OFF TO CONFERENCE.

Miss Crill, who had charge of the services at the Free Methodist church during the past year, will leave tomorrow for Apollo, where she will attend the annual conference. She spent today in the county calling on friends.

### Will Return to Work.

Daniel McBane, the laborer who was injured while at work at the mill yesterday, will return to the mill Monday. His injuries are not as serious as was first thought and he is getting along nicely.

### Another Suicide.

It was reported in Chester this morning that a man named Stewart had committed suicide in Cumberland last evening. No particulars of the affair are known.

### SOUTHSIDE NEWS.

Interesting News Notes About People and Things Across the Ohio.

John Shrader has sold in the neighborhood of 24 houses since the first of the year.

County Superintendent Allison was in Chester yesterday and during the afternoon made an address to the scholars of the Grant schools. He stated many new educational features had been added to the schools throughout the county.

A new force of laborers was put to work at the narrows this morning. Several Liverpool men are employed.

The Gypsies who arrived in Chester Monday night purchased a shantyboat yesterday and will go south on the next rise.

Henry Riley and Washington Johnson drove over the country yesterday and purchased cattle.

A barber shop has been opened on the county road.

There is no change in the condition of Miss Cunningham and Miss Jackson.

The Polish woman who lost her way while crossing from New Jersey to Mercer last week, arrived at the settlement last night. Upon her arrival the other women in the party served refreshments.

## DR. CRAWFORD HOME.

Returns From the Alliance Conference and Reports It Most Successful.

Rev. Clark Crawford, D. D., has returned from Alliance, where he has been attending the session of the East Ohio M. E. conference during the past week. He reports the meeting as one of the most successful conferences he has attended.

Upon Bishop Mallalien's suggestion October 4 will be observed throughout the conference as a day of special prayer.

The conference adopted resolutions favoring absolute prohibition of the liquor traffic, protesting against the army canteen, condemning the opinion of the attorney general that it was legal and calling upon President McKinley to suppress the sale of liquor in the army until the courts can pass upon the legality of it. A resolution protesting against the seating of Mormon Roberts, the polygamist congressman from Utah, was also passed.

The conference opposes any changes in conference boundaries and refused to approve the consolidation of Scio and Mt. Union colleges. East Liverpool was one of the cities inviting the conference in 1900, but Youngstown won unanimously.

### BROKE THE RECORD.

Conference Report on Benevolences Exceed That of Any Previous Year.

ALLIANCE, Sept. 19.—The report of collections for benevolences this year by the East Ohio M. E. conference are in excess of any previous year. For missions, \$20,000, an increase of \$5,141 over last year; Church Extension society, \$2,087; Bible society, \$805; Episcopal fund, \$624; educational fund, \$1,200; Children's day, \$1,529, making a grand total for all benevolences the sum of \$20,559, the largest amount ever given in any one year.

### A LIBRARY

Of 200 Volumes Presented to Second Presbyterian Sunday School by E. D. Moore.

Sunday morning Mr. E. D. Moore presented to the Sunday school of the Second Presbyterian church a library of nearly 200 volumes of excellent books. Mr. Moore was formerly superintendent of the school, and he has the hearty thanks of the Sunday school and church, who highly appreciate his gift.

### East Liverpool Horses at Salem.

East Liverpool horses will be well represented at the Salem races as H. S. R., Brownie H., Colonel Breckenridge and Chicago Boy, all local horses, will start. In addition to these Russell Wilkes, formerly owned by Philip Morley, and Egremont, owned by Dr. Wamaker, have been entered.

### The Elks' Picnic.

The Elks' picnic held yesterday at Rock Spring was very largely attended considering the inclement weather, and those present thoroughly enjoyed themselves, the affair being one of the most pleasant of the season.

### OPERATION ON HIS EYE

William Chambers Injured at the Klondike Pottery.

### SEVERAL MEETINGS TO BE HELD

Alfred Marsh May Get His Money Back Rally Day at Second U. P. Church Next Sunday—Motormen to Hold an Important Meeting.

William Chambers, of North avenue, while at work in the Klondike pottery Monday repairing some tools, was injured in the left eye by a piece of steel. The eye commenced to swell and the man was taken to his home. Yesterday an operation was found to be necessary. He will be unable to resume his work for several days as he cannot see from that eye.

### AFTER HIS MONEY.

Alfred Marsh Has a Suspicion as to Who Robbed Him.

Yesterday a reporter saw Alfred Marsh, of Maple street, who was relieved of \$28 last week and when asked if he had a clue to the parties who took his money said:

"The crowd of boys that were loitering about the street on that day are known and it is probable that something may turn up within a few days. We have been keeping our eyes open and I have not given up hope of securing the money."

### REVIVAL MEETINGS.

All East End Churches Will Hold a Series of Special Meetings.

Every church in East End during the winter will hold revival services and it is thought by many that the first to be held will be in the Second M. E. church early in December. Very little attention has been given to the matter by the Presbyterian churches but Reverend Crowe and Reverend Greene have said meetings in their churches would be held during the holidays.

### RALLY DAY.

Sunday School Will Render a Fine Program Next Sunday Morning.

At the Second U. P. church next Sunday morning the annual rally day service will be observed. A special program of music has been arranged and among the speakers will be a number of Sunday school teachers. An address will be made by Rev. J. R. Greene. There will be no Sunday school service, it and the regular church service being combined.

### Could Not Stand the Climate.

Louis Farmer, of Middleport, who has been employed as a bricklayer on the new Laughlin pottery since June, returned to his home yesterday. He has not been well since he struck the town and to a reporter said he was glad to get out of it.

### Motormen Will Meet.

The motormen and conductors of the street railway line will hold their regular monthly meeting one week from next Saturday night. Some important business will be acted upon.

### This Is Hard Luck.

Yesterday morning Alfred McKinnon and Charles Sawers went hunting in the woods back of East End. They returned in the evening with only one small ground squirrel.

### Purchased Extinguishers.

The board of trustees of the Second U. P. church purchased several extinguishers at their recent meeting and they are expected to be placed in the church next week.

### Personal.

Miss Jennie Boyce, of Apollo, who has been a guest of her sister, Mrs. William Terrence, of First avenue, for several weeks, returned to her home yesterday.

### Will Resume Monday.

Owing to the inability to get the new boilers and brick machines in place the brick works did not start this week. Monday is now set for starting.

### Robbing Grape Vines.

A number of small boys entered the yard of Lincoln Harker Monday night and stole a quantity of grapes. The police are now after them.

### NOTICE.

Water consumers will make note that the fire plugs will be cleaned Wednesday and Thursday of this week.

### ARE FOUR MONTHS LATE

Much Time Has Been Lost In Mill Construction.

#### RAILROAD COMPANY AT FAULT

Said Extension Would Be Completed In August—County Superintendent Allison In Chester Yesterday—Another Slide at the Narrows Last Night.

The Chester Rolling Mill company are making all possible haste in the erection of their mill, but the officers are somewhat discouraged about having the mill in operation by the first of the year, as was expected when work was first started.

One of the officers of the company when seen this morning said: "No, we will be four months late in starting the mill. When we started work the railroad company said the extension would be completed by August, but they have failed to keep their promise. Four months' running now, the way business is, is worth a year's running when business is just ordinary. As it is at present we are losing money right along. We should be in operation now."

"We had a good offer from McDonald to locate there at the same time we were considering this site and were looking with favor upon it. Had we built then we would have been running by this time."

#### ARE SATISFIED.

Railroad Company Make No Complaint About Court's Decisions.

Attorney Somerville, of Wheeling, during his recent visit to Chester said it would not be known definitely whether or not the property owners who had contested in court the condemnation of their property would appeal from the decisions of the commissioners until the fall term of the court opens. He thinks the decisions are satisfactory to the railroad company.

#### ANOTHER SLIDE.

Much Earth Caved In at the Narrows During the Night.

The rain of yesterday caused about 300 tons of earth to cave in at the narrows during the night, and for several days the work of grading will be discontinued. A large force of men are now at work cleaning the roadway.

#### OFF to Conference.

Miss Crill, who had charge of the services at the Free Methodist church during the past year, will leave tomorrow for Apollo, where she will attend the annual conference. She spent today in the county calling on friends.

#### Will Return to Work.

Daniel McBane, the laborer who was injured while at work at the mill yesterday, will return to the mill Monday. His injuries are not as serious as was first thought and he is getting along nicely.

#### Another Suicide.

It was reported in Chester this morning that a man named Stewart had committed suicide in Cumberland last evening. No particulars of the affair are known.

## DR. CRAWFORD HOME.

Returns From the Alliance Conference and Reports It Most Successful.

Rev. Clark Crawford, D. D., has returned from Alliance, where he has been attending the session of the East Ohio M. E. conference during the past week. He reports the meeting as one of the most successful conferences he has attended.

Upon Bishop Mallalien's suggestion October 4 will be observed throughout the conference as a day of special prayer.

The conference adopted resolutions favoring absolute prohibition of the liquor traffic, protesting against the army canteen, condemning the opinion of the attorney general that it was legal and calling upon President McKinley to suppress the sale of liquor in the army until the courts can pass upon the legality of it. A resolution protesting against the seating of Mormon Roberts, the polygamist congressman from Utah, was also passed.

The conference opposes any changes in conference boundaries and refused to approve the consolidation of Scio and Mt. Union colleges. East Liverpool was one of the cities inviting the conference in 1900, but Youngstown won unanimously.

### OPERATION ON HIS EYE

William Chambers Injured at the Klondike Pottery.

#### SEVERAL MEETINGS TO BE HELD

Alfred Marsh May Get His Money Back Rally Day at Second U. P. Church Next Sunday—Motormen to Hold an Important Meeting

William Chambers, of North avenue, while at work in the Klondike pottery Monday repairing some tools, was injured in the left eye by a piece of steel. The eye commenced to swell and the man was taken to his home. Yesterday an operation was found to be necessary. He will be unable to resume his work for several days as he cannot see from that eye.

#### AFTER HIS MONEY.

Alfred Marsh Has a Suspicion as to Who Robbed Him.

Yesterday a reporter saw Alfred Marsh, of Maple street, who was relieved of \$28 last week and when asked if he had a clue to the parties who took his money said:

"The crowd of boys that were loitering about the street on that day are known and it is probable that something may turn up within a few days. We have been keeping our eyes open and I have not given up hope of securing the money."

#### REVIVAL MEETINGS.

All East End Churches Will Hold a Series of Special Meetings.

Every church in East End during the winter will hold revival services and it is thought by many that the first to be held will be in the Second M. E. church early in December. Very little attention has been given to the matter by the Presbyterian churches but Reverend Crowe and Reverend Greene have said meetings in their churches would be held during the holidays.

#### RALLY DAY.

Sunday School Will Render a Fine Program Next Sunday Morning.

At the Second U. P. church next Sunday morning the annual rally day service will be observed. A special program of music has been arranged and among the speakers will be a number of Sunday school teachers. An address will be made by Rev. J. R. Greene. There will be no Sunday school service, it and the regular church service being combined.

#### Could Not Stand the Climate.

Louis Farmer, of Middleport, who has been employed as a bricklayer on the new Laughlin pottery since June, returned to his home yesterday. He has not been well since he struck the town and to a reporter said he was glad to get out of it.

#### Motormen Will Meet.

The motormen and conductors of the street railway line will hold their regular monthly meeting one week from next Saturday night. Some important business will be acted upon.

#### This Is Hard Luck.

Yesterday morning Alfred McKinnon and Charles Sawers went hunting in the woods back of East End. They returned in the evening with only one small ground squirrel.

#### Purchased Extinguishers.

The board of trustees of the Second U. P. church purchased several extinguishers at their recent meeting and they are expected to be placed in the church next week.

#### Personal.

Miss Jennie Boyce, of Apollo, who has been a guest of her sister, Mrs. William Terrence, of First avenue, for several weeks, returned to her home yesterday.

#### Will Resume Monday.

Owing to the inability to get the new boilers and brick machines in place the brick works did not start this week. Monday is now set for starting.

#### Robbing Grape Vines.

A number of small boys entered the yard of Lincoln Harker Monday night and stole a quantity of grapes. The police are now after them.

#### NOTICE.

Water consumers will make note that the fire plugs will be cleaned Wednesday and Thursday of this week.

## SADDEST CRY IN THE WORLD

Is the Cry of the Unemployed:  
"Out of a Job."

### OVERPRODUCTION AND WASTE

A Startling Statement, Backed by Official  
Facts and Figures--The World Owe  
Every Man a Job and the Leader of the  
Rochester Movement Shows How It Can  
Be Got.

The saddest cry the world around is  
the cry of the unemployed.

What shall be done with the man who  
wants work, but can't get it?

Shall he starve, steal, beg or go to the  
poorhouse? Neither.

He is too proud to beg, too honest to  
steal, too good to starve and God placed  
him in a world of plenty and never in-  
tended him to eat the bread of a pauper.

There is only one thing to do with the  
man out of a job.

Give him work.

The right to work is as sacred as the  
right to life.

What is "life, liberty and the pursuit  
of happiness" to a starving man?

A man with a family depending upon  
the strength of his arm, hunting in  
vain for a chance to work, impeaches  
our civilization.

Society owes to every man a job.

One way to discharge this debt is by  
preventing waste.

Money spent for that which does not  
preserve health, give strength, prolong  
life, or in any way help to perform la-  
bor, that is waste.

If, on the other hand, that for which  
money is spent is an injury to the pub-

lic health, shortens life, creates weak-  
ness, disorder and crime; and curses  
labor by lessening the demand for the  
products of his hand--then it is worse  
than wasted.

### The Curse of Labor.

"The curse of labor is overproduc-  
tion."

That is not true,  
There is no such thing as overproduc-  
tion with a million human needs un-  
supplied.

No overproduction of shoes with chil-  
dren's feet bare; no overproduction of  
furniture with unfurnished homes; no  
overproduction of carpets with bare  
floors.

The three million and a half dollars  
being spent in the saloons of Rochester  
this year is wasted. Applying the test  
in paragraph two it is worse than  
wasted.

Suppose one million dollars of that  
money was spent for clothing; you  
would hear nothing more of overproduc-  
tion in clothing.

Suppose a half million more was spent  
for shoes, another half million for dry  
goods, another half million for furni-  
ture, etc., you would hear nothing more  
of overproduction in those lines of in-  
dustry.

And one thing more you would not  
hear of--an overproduction of men.

We don't have to go outside of Ro-  
chester to prove that.

According to the U. S. Census Bureau  
Report, the breweries of Rochester  
have \$6,455,000 capital invested, they  
pay \$381,000 in wages and employ  
434 hands. The men's clothing indus-  
try, with \$300,000 less capital invested,  
pay \$1,561,000 in wages and employ 3,132  
hands.

The boot and shoe industry in Roche-  
ster, with \$3,281,000 capital invested,  
about one-half the amount invested in  
breweries, pay \$2,031,000 in wages and  
employ 4,868 hands.

This is how they size

	Dollars Invested.	Men Employ'd.	Wages Paid.
Breweries .....	\$6,455,000	434	\$ 381,000
Clothing .....	6,150,000	3,132	1,561,000
Boots and shoes ..	3,281,000	4,868	2,031,000

One-half the investment in the shoe  
industry employs eleven times as many  
hands and pays five times as much in  
wages as the beer industry.

The same investment that gives em-  
ployment to 434 men in the breweries of  
Rochester would give employment to  
9,736 hands if it was invested in making  
shoes.

The picture frame factories of Roche-  
ster, with thirty-two times less capital  
invested, employs 24 more hands than  
the breweries, and with the same amount  
of money invested would employ 13,000  
help.

Apply these facts to the country at  
large; divide the money now spent in  
the saloons among the twenty leading  
necessaries of life, and it would require  
four hundred million dollars more raw  
material than is now used in the manu-  
facture of drink to manufacture them  
and give employment to 1,347,000 more  
men.

Spend it that way for two years and  
we will write another document on  
"What Shall Be Done With a Job That  
Wants a Man and Can't Get Him?"

And the only answer to that will be:  
Offer more wages.

Suppose that only one-half of the  
drink bill of the United States is paid  
by the workingmen; in two years they  
spend more money over the bar than  
the entire production of gold in Cali-  
fornia since its discovery in 1849 up to  
the present time. Men, go dry for two  
years and you can buy the Klondike and  
have money to spare.

## DIRECTORS WILL HELP

Carry the Library Bond Issue  
Saturday.

### THEY TOOK DECISIVE ACTION

At a Meeting Last Night and It Will Not  
be Their Fault If There Is Not a Full  
Vote Out--What Prominent People  
Think of the Election.

There was a large attendance last  
evening at the meeting of the library  
directors and decisive action was taken  
towards carrying the bond issue Satur-  
day.

Messrs. Peach, Rayman and Logan  
were appointed a committee to wait  
upon Trades council this evening and  
solicit the aid of the council to secure a  
full vote on the bond issue Saturday.

Messrs. Rayman, Peach, Hanley,  
Bough and Brownfield were appointed  
to take charge of the advertising and  
they will meet late this afternoon to  
formulate plans to get the matter more  
fully before the people.

### WHAT THEY THINK.

The Views of Several Prominent  
People on the Bond  
Issue.

The NEWS REVIEW interviewed sev-  
eral people on the bond issue and their  
views are as follows.

George H. Owen: I think the bond  
issue will carry, certainly, but I think  
there will be some votes against it.

William Erlanger: We should most  
assuredly buy the site. If we ever want  
a library centrally located that is the  
place for it. I want the bond issue to  
carry.

Isaac W. Knowles: As a general  
thing I am opposed to putting the town  
in debt any more, but this issue should  
carry and I will vote for it. I would go  
that far in order to save that \$50,000.

James R. Hill: It is a good thing  
and the issue should carry.

Dr. W. A. Hobbs: I will vote for the  
bond issue and the proposition should  
pass.

J. W. Gipner: It should go through  
and I will vote for it. When a man  
donates \$50,000 to the city it is the duty  
of the community to do their part.

Suit Against the Administrator  
to Recover on Two Promis-  
sory Notes.

LISBON, Sept. 20.--[Special]--Ida O.  
Bradshaw Reynolds, of Chicago, has  
brought suit against W. L. Smith, as  
administrator of the estate of Cynthia  
Bradshaw, asking a judgment upon two  
promissory notes, one of \$400 and one of  
\$362.15, with interest. She claims she  
has presented the notes to the adminis-  
trator for acknowledgment, and he has  
refused to recognize her claim.

Ideals at the Grand last night, proved  
another good play presented in a care-  
ful and painstaking manner to the en-  
tire satisfaction of a large audience.  
The specialties were pleasing and the  
music by Howson's orchestra a big fea-  
ture. Tonight a scenic melodrama, "The  
Ladder of Life," will be given. The or-  
chestra will play a descriptive overture,  
"A Day With the Circus." The sale of  
seats indicates another crowded house.

## SADDEST CRY IN THE WORLD

Is the Cry of the Unemployed:  
"Out of a Job."

## OVERPRODUCTION AND WASTE

A Startling Statement, Backed by Official  
Facts and Figures--The World Owe  
Every Man a Job and the Leader of the  
Rochester Movement Shows How It Can  
Be Got.

The saddest cry the world around is  
the cry of the unemployed.

What shall be done with the man who  
wants work, but can't get it?

Shall he starve, steal, beg or go to the  
poorhouse? Neither.

He is too proud to beg, too honest to  
steal, too good to starve and God placed  
him in a world of plenty and never in-  
tended him to eat the bread of a pauper.

There is only one thing to do with the  
man out of a job.

Give him work.

The right to work is as sacred as the  
right to life.

What is "life, liberty and the pursuit  
of happiness" to a starving man?

A man with a family depending upon  
the strength of his arm, hunting in  
vain for a chance to work, impeaches  
our civilization.

Society owes to every man a job.

One way to discharge this debt is by  
preventing waste.

Money spent for that which does not  
preserve health, give strength, prolong  
life, or in any way help to perform la-  
bor, that is waste.

If, on the other hand, that for which  
money is spent is an injury to the pub-

lic health, shortens life, creates weak-  
ness, disorder and crime; and curses  
labor by lessening the demand for the  
products of his hand--then it is worse  
than wasted.

### The Curse of Labor.

"The curse of labor is overproduc-  
tion."

That is not true,

There is no such thing as overproduc-  
tion with a million human needs un-  
supplied.

No overproduction of shoes with chil-  
dren's feet bare; no overproduction of  
furniture with unfurnished homes; no  
overproduction of carpets with bare  
floors.

The three million and a half dollars  
being spent in the saloons of Rochester  
this year is wasted. Applying the test  
in paragraph two it is worse than  
wasted.

Suppose one million dollars of that  
money was spent for clothing; you  
would hear nothing more of overproduc-  
tion in clothing.

Suppose a half million more was spent  
for shoes, another half million for dry  
goods, another half million for furni-  
ture, etc., you would hear nothing more  
of overproduction in those lines of in-  
dustry.

And one thing more you would not  
hear of--an overproduction of men.

We don't have to go outside of Ro-  
chester to prove that.

According to the U. S. Census Bureau  
Report, the breweries of Rochester  
have \$6,455,000 capital invested, they  
pay \$381,000 in wages and employ  
434 hands. The men's clothing indus-  
try, with \$300,000 less capital invested,  
pay \$1,561,000 in wages and employ 3,132  
hands.

The boot and shoe industry in Roches-  
ter, with \$3,281,000 capital invested,  
about one-half the amount invested in  
breweries, pay \$2,031,000 in wages and  
employ 4,868 hands.

This is how they size

	Dollars Invested.	Men Employ'd.	Wages Paid.
Breweries.....	\$6,455,000	434	\$ 381,000
Clothing.....	6,150,000	3,132	1,561,000
Boots and shoes.....	3,281,000	4,868	2,031,000

One-half the investment in the shoe  
industry employs eleven times as many  
hands and pays five times as much in  
wages as the beer industry.

The same investment that gives em-  
ployment to 434 men in the breweries of  
Rochester would give employment to  
9,736 hands if it was invested in making  
shoes.

The picture frame factories of Roches-  
ter, with thirty-two times less capital  
invested, employs 24 more hands than  
the breweries, and with the same amount  
of money invested would employ 13,000  
help.

Apply these facts to the country at  
large; divide the money now spent in  
the saloons among the twenty leading  
necessaries of life, and it would require  
four hundred million dollars more raw  
material than is now used in the manu-  
facture of drink to manufacture them  
and give employment to 1,347,000 more  
men.

Spend it that way for two years and  
we will write another document on  
"What Shall Be Done With a Job That  
Wants a Man and Can't Get Him?"

And the only answer to that will be:  
Offer more wages.

Suppose that only one-half of the  
drink bill of the United States is paid  
by the workmen; in two years they  
spend more money over the bar than  
the entire production of gold in Cali-  
fornia since its discovery in 1849 up to  
the present time. Men, go dry for two  
years and you can buy the Klondike and  
have money to spare.

George H. Owen: I think the bond

there will be some votes against it.

William Erlanger: We should most  
assuredly buy the site. If we ever want  
a library centrally located that is the  
place for it. I want the bond issue to  
carry.

Isaac W. Knowles: As a general  
thing I am opposed to putting the town  
in debt any more, but this issue should  
carry and I will vote for it. I would go  
that far in order to save that \$50,000.

James R. Hill: It is a good thing

Dr. W. A. Hobbs: I will vote for the

J. W. Gipner: It should go through

### The Ladder of Life Tonight.

"The Irish Hero," presented by The  
Ideals at the Grand last night, proved  
another good play presented in a care-  
ful and painstaking manner to the en-  
tire satisfaction of a large audience.  
The specialties were pleasing and the  
music by Howson's orchestra a big fea-  
ture. Tonight a scenic melodrama, "The  
Ladder of Life," will be given. The or-  
chestra will play a descriptive overture,  
"A Day With the Circus." The sale of  
seats indicates another crowded house.

Around the Plants—Unabated Activity  
Reported Everywhere.

Rush of orders has caused the Sebring and Standard companies to work at night since Monday.

Cartwright's claim the only trouble at their plant is that of being unable to get their orders out on time. Every department is running to its full capacity. The same conditions exist at the plant of the French China company.

George Smith, of the Knowles, Taylor & Knowles pottery, who has been in the west for several weeks, has returned home.

Goodwin's will soon place a new dinner set on the market. It has been named the "Fortune."

Martin Thornberry, a glost kilnman at the Goodwin pottery, is working out his two weeks' notice. He will go to the new Salem pottery.

Allen Hargraves, a packer at Cartwright's, is helping the Globe packers for several days.

An additional kilnhand has been placed on at the Goodwin pottery.

The Wallace and Chetwynd Pottery company has increased its capital stock from \$150,000 to \$176,400.

A number of workmen in the river potteries will erect homes in Chester next spring.

The West End pottery is enjoying an excellent run on the Col. A. L. Hawkins plate.

Williard Morris has returned from a western trip in the interests of the Knowles, Taylor & Knowles company. Julius Pointer, engineer at the Murphy pottery, has returned to work after spending a two weeks' vacation at Parkersburg with friends.

Lawrence Stevenson, formerly of the French China, is now at the McNicol pottery, having charge of the warehouse.

Charles Wolf, a saucer jiggerman at Sebring's, is confined to his home on account of rheumatism.

J. S. Dunlap, an inventor residing in Chicago, arrived in the city last evening and registered at the Thompson House. This morning he placed an order for 100 semi-vitreous porcelain pots to be used on his latest invention, the Dunlap coffee percolation. The order is a small one compared with those that will be placed in November.

Carshipments of ware since Monday have been made by the Knowles, Taylor & Knowles, McNicol, Thompson, Standard and Sebring companies. The cars were sent to the west and south.

John Barto, of the Liverpool pottery, who has been in Freedom for several days, has returned to work.

The East End Pottery now has a full crew at work in the kiln department. The scarcity of this kind of labor is being met by men coming from other pottery towns.

Harry Grosscross, of East Palestine, is now at the Diamond casting the cow creamer. The firm has had a phenomenal run on this little novelty. Thousands have been sold.

Gotham & Lockart have completed models for a new dinner and toilet set for the Ohio China company at East Palestine.

A run on novelties will soon be made by the Cartwright pottery.

Julius Levi, a New York buyer, has been spending several days in the city placing orders.

Cartwright's will ship a car to Birmingham, Ala., Friday. It is now being packed.

Moulds are now being made for a new dinner set to be made by the National pottery. It has not been named.

Luther Miller, of Troy, O., has taken a position in the office at the Sebring pottery.

The Diamond is having an excellent run on the Matchless dinner and Manhattan toilet sets.

It isn't necessary for a woman to give particulars. When she says she has "female troubles", other women know what that means. It means days and nights of endless suffering. It means headaches which no tongue can describe. It means that terrible bearing and dragging down in the lower abdomen. It means agonizing backache, and shoulder ache, and arm ache, and aches in the lower limbs. It means nerves on edge—the blues—despondency and loss of hope. It means debilitating drains that the doctors call leucorrhoea. It means martyrdom—sometimes even death seems preferable. And still Wine of Cardui will utterly put those diseases and pains to rout. It has cured thousands of cases when nothing else on earth would. To the budding woman, to the bride, to the wife, to the expectant mother, to those going through

McLEER'S  
Wine of Cardui

It isn't necessary for a woman to give particulars. When she says  
she has "female troubles", other women know what that means. It  
means days and nights of endless suffering. It means headaches which  
no tongue can describe. It means that terrible bearing and dragging  
down in the lower abdomen. It means agonizing backache, and shoulder  
ache, and arm ache, and aches in the lower limbs. It means nerves on  
edge—the blues—despondency and loss of hope. It means debilitating  
drains that the doctors call leucorrhoea. It means martyrdom—some-  
times even death seems preferable. And still Wine of Cardui will utterly  
put those diseases and pains to rout. It has cured thousands of cases  
when nothing else on earth would. To the budding woman, to the  
bride, to the wife, to the expectant mother, to those going through  
the Change of Life, this Vegetable Wine is a blessing.

## NEWS OF THE CITY'S FACTORIES

Personal Paragraphs Pertaining to Pot-  
ters—Items of Interest Picked Up  
Around the Plants—Unabated Activity  
Reported Everywhere.

Rush of orders has caused the Sebring  
and Standard companies to work at  
night since Monday.

Cartwright's claim the only trouble at  
their plant is that of being unable to get  
their orders out on time. Every de-  
partment is running to its full capacity.  
The same conditions exist at the plant  
of the French China company.

George Smith, of the Knowles, Tay-  
lor & Knowles pottery, who has been in  
the west for several weeks, has returned  
home.

Goodwin's will soon place a new din-  
ner set on the market. It has been  
named the "Fortune."

Martin Thornberry, a glost kilnman  
at the Goodwin pottery, is working out  
his two weeks' notice. He will go to the  
new Salem pottery.

Allen Hargraves, a packer at Cart-  
wright's, is helping the Globe packers  
for several days.

An additional kilnhand has been  
placed on at the Goodwin pottery.

The Wallace and Chetwynd Pottery  
company has increased its capital stock  
from \$150,000 to \$175,400.

A number of workmen in the river  
potteries will erect homes in Chester  
next spring.

The West End pottery is enjoying an  
excellent run on the Col. A. L. Hawkins  
plate.

Williard Morris has returned from a  
western trip in the interests of the  
Knowles, Taylor & Knowles company.

Julius Pointer, engineer at the Mur-  
phy pottery, has returned to work after  
spending a two weeks' vacation at  
Parkersburg with friends.

Lawrence Stevenson, formerly of the  
French China, is now at the McNicol  
pottery, having charge of the ware-  
house.

Charles Wolf, a saucer jiggerman at  
Sebring's, is confined to his home on ac-  
count of rheumatism.

J. S. Dunlap, an inventor residing in  
Chicago, arrived in the city last even-  
ing and registered at the Thompson  
House. This morning he placed an or-  
der for 100 semi-vitreous porcelain pots  
to be used on his latest invention, the  
Dunlap coffee percolation. The order is  
a small one compared with those that  
will be placed in November.

Car shipments of ware since Monday  
have been made by the Knowles,  
Taylor & Knowles, McNicol, Thompson,  
Standard and Sebring companies. The  
cars were sent to the west and south.

John Barto, of the Liverpool pottery,  
who has been in Freedom for several  
days, has returned to work.

The East End Pottery now has a full  
crew at work in the kiln department.  
The scarcity of this kind of labor is be-  
ing met by men coming from other pot-  
tery towns.

Harry Grosscross, of East Palestine,  
is now at the Diamond casting the cow  
creamers. The firm has had a phenom-  
enal run on this little novelty. Thou-  
sands have been sold.

Gotham & Lockart have completed  
models for a new dinner and toilet set  
for the Ohio China company at East  
Palestine.

A run on novelties will soon be made  
by the Cartwright pottery.

Julius Levi, a New York buyer, has  
been spending several days in the city  
placing orders.

Cartwright's will ship a car to Bir-  
mingham, Ala., Friday. It is now be-  
ing packed.

Moulds are now being made for a new  
dinner set to be made by the National  
pottery. It has not been named.

Luther Miller, of Troy, O., has taken  
a position in the office at the Sebring  
pottery.

The Diamond is having an excellent  
run on the Matchless dinner and Man-  
hattan toilet sets.

## THE ALUM BAKING POWDERS.

Names of Some of Principal Brands Sold  
In This Vicinity.

The recent discussion in the papers of  
the effect upon the human system from  
food made with alum baking powders  
and the emphatic opinions that have  
been published from noted scientists to  
the effect that such powders render the  
food unwholesome, leading to grave dis-  
orders of the stomach, liver and heart,  
have caused numerous inquiries for the  
names of the various alum powders.

Information as to the list here given,  
has been obtained from the official re-  
port of the Ohio Food Commission, from  
State Chemist Huston, of Indiana (as  
to the Calumet baking powder), from  
the Agricultural Department chemist at  
Washington, and from other equally re-  
liable authority.

In Minnesota and Wisconsin of such  
importance is the matter deemed that  
not only are the names of alum powders  
officially made public, but the legisla-  
tures of both states have provided that  
there shall be printed in plain type upon  
the labels of all packages of this class of  
powders the statement that they con-  
tain alum.

## DEMOCRACY'S LATEST TRANSPARENCY.

CHORUS (Bryan, Lentz and Altgeld)---- Here's a bogie for your life; watch us  
scare the voters."

In addition to these, it is learned that  
very many grocers are selling what they  
call their own private or special brands.  
These powders are put up for the grocer  
and his name put upon the labels by  
manufacturers of alum powders in  
Chicago, Cincinnati, St. Louis, and else-  
where. The manufacturers, it is said,  
find their efforts to market their goods  
in this way greatly aided by the ambi-  
tion of the grocer to sell a powder with  
his own name upon the label, especially  
as he can make an abnormal profit upon  
it. Many grocers, doubtless, do not  
know that the powders they are thus  
pushing are detrimental to health and  
would be actually contraband in many  
sections if sold without disguise.

It is quite impossible to give the names  
of all the alum baking powders in the  
market. They are constantly appear-  
ing to all sorts of disguises and under all  
kinds of cognomens. They can be  
avoided, however, by the housekeeper  
who will bear in mind that all baking  
powders sold at twenty-five cents or less  
per pound are liable to contain alum, as  
pure cream of tartar powders cannot be  
produced at anything like this price.

### TO CLEVELAND.

Cleveland and Pittsburg May Run a Train  
to That Place on Sunday.

"Since the Sunday trains have been  
placed on the Cleveland and Pittsburg  
road they have been well patronized by  
residents of this city," said Agent Adam  
Hill this morning. "When the train  
was first run only two passenger coaches  
were on the train but now it requires  
three coaches to accommodate the  
patrons."

There is some talk of a Cleveland  
train being started, but how soon the  
company will start it is not known. The  
Cleveland train is being talked about  
along the main line but nothing definite  
has been given out about the future  
plans of the company.

# GOT THE WRONG GIRL

She Didn't Sweep Dust or Use  
a Broom,

BUT SHE DID THROW WATER

William E. Chambers Made a Complaint  
Against Sarah McCormick, and Officer  
White Served the Papers on Another Mc-  
Cormick Girl, Who Said She Had Trouble  
With the Wrights.

Family troubles were the whole thing  
before Mayor Bough yesterday, and he  
has not yet succeeded in straightening  
them out.

William E. Chambers filed an affidavit  
against Sarah McCormick for assault  
upon Mary Wright. The parties live in  
East End, and it was claimed that Mary  
was passing the McCormick residence  
when Sarah swept dust on her and hit  
her with the broom. Officer White  
was given the papers to serve, and go-  
ing to the McCormick residence asked  
a girl if she had trouble with the  
Wright family. She replied that she  
had and she was told to appear at the  
mayor's office. When she arrived last  
evening it was discovered that she was  
not the girl wanted, as she didn't sweep  
any dust or use a broom, but that she  
had ducked a member of the Wright  
family with a pan of water some few  
days ago and she thought that was  
what Officer White wanted her for.  
She was told to go home and be good.

## FRANCE AND HER FAIR.

### Effect of the Dreyfus Case on the Exposition.

### MANY HEBREWS REVENGEFUL.

Will France Be Able to Re-establish Herself in the Eyes of the World? American Exhibitors Disposed to Be Conservative.

The storm of public protest against the Dreyfus decision, which has swept over America with more force, perhaps, than anywhere else, aroused at first grave doubts in the minds of many who intended to visit or exhibit at the Paris exposition of 1900 whether they might not better reconsider their plans. On the part of exhibitors, says the New York Tribune, the question was doubly important. They asked themselves whether the outraged feelings which have been aroused all over the world by the iniquitous Dreyfus decision might not keep so many visitors away from the exposition that it would hardly be worth while to display their goods. They were also conjecturing whether a country which might possibly submit to having its temple of justice turned into a moral shambles by a clique of army generals would be able to guarantee the safety of the goods to be exhibited from the incendiaryism of an always possible Paris mob.

Among the prospective American exhibitors are many Hebrew merchants and manufacturers, and some of them perhaps fear that so long as anti-Semitic hatred might influence France to the defeat of equity and honor and national dignity their lives and property might not be safe from actual violence should the mob leaders undertake for any sinister purpose to stir up the enmity of the riffraff of Paris against them. The question also arose, would any French judge of exhibits venture to award a prize to a Hebrew rival of a Gaelic exhibitor in a city whose dead walls are plastered with placards like these: "Down with the Jew!" "Buy nothing from a Jew!" "Spit on the Jews!" "Death to the Jews!"

Then, again, prospective exhibitors, who are not Hebrews, were worried at first by the knowledge that many Hebrews are determined fighters, full of grit and courage, and the fiercer the hatred of them grows and the more their enemies threaten, the more determined they would become to display their wares at that very exhibition and carry off as many prizes as possible. Therefore, it could be depended upon, they imagine, that some Hebrew would provide that identical form of provocation for the French Jew baiters which nervous exhibitors most dreaded, and if a Paris mob should once begin to vent its spite upon the exhibits of Hebrews, it would not stop to discriminate. Moreover, anarchists, who love destruction for destruction's sake, and form a large part of every Paris mob, might be expected to see that no discrimination was made, but that all they could reach mingled in one red ruin.

These are some of the uncomfortable thoughts which, when the Dreyfus verdict was first announced, disturbed the minds of many Americans who had already gone to considerable expense in preparing for the exhibition. One of the largest items of their expense, so far, has been the outlay for showcases. Many thousands of dollars have been already laid out in this way alone. No expense has been spared to make the showcases handsome, striking and especially adapted in their shape to display goods to the best advantage in the somewhat circumscribed space allotted for the exhibition purposes. Many Americans have caused special goods to be manufactured for the Paris World's fair, and to withdraw their exhibits now would entail a loss, but that loss at this early stage of the scheme would be light, they thought, compared with what might happen if a raging anti-Semitic mob should start a riot in Paris while the exhibition was going on and while the only force that could be trusted to maintain order was an army, some of whose generals were corrupt, and a police force that would allow a single Guerin to defy it and make a laughing stock of it before the whole world, for weeks and weeks together.

But cool reflection has led Americans to take a more hopeful view of the situation. They see that France has so much to lose by a failure of her exhibition and so much to gain in this and countless other ways by restoring justice to her proper pedestal and by humiliating those who would make a mock of her before the world that it seems to be impossible that she should not take the necessary steps to set herself right before all the civilized nations. The exhibition is still a considerable way off, and a few weeks, even a few days, may make an entire change in the fate of Dreyfus and the condition of his persecutors. If France does take steps toward that end, would be exhibitors feel that the Paris fair

will be a great success; and no matter what their own or others' opinion may be. Interviews with the agents of steamship companies show that they are already booking passengers for 1900 at a rate which threatens to make a big fleet of extra steamships necessary, and inquiry at the office of Commissioner General Peck shows that no exhibitor has given up his allotted space. The success of the fair is in France's own hands now, and Americans are hopeful that she will know how to preserve it.

## FRANCE AND HER FAIR.

### Effect of the Dreyfus Case on the Exposition.

### MANY HEBREWS REVENGEFUL.

Will France Be Able to Re-establish Herself in the Eyes of the World? American Exhibitors Disposed to Be Conservative.

The storm of public protest against the Dreyfus decision, which has swept over America with more force, perhaps, than anywhere else, aroused at first grave doubts in the minds of many who intended to visit or exhibit at the Paris exposition of 1900 whether they might not better reconsider their plans. On the part of exhibitors, says the New York Tribune, the question was doubly important. They asked themselves whether the outraged feelings which have been aroused all over the world by the iniquitous Dreyfus decision might not keep so many visitors away from the exposition that it would hardly be worth while to display their goods. They were also conjecturing whether a country which might possibly submit to having its temple of justice turned into a moral shambles by a clique of army generals would be able to guarantee the safety of the goods to be exhibited from the incendiary of an always possible Paris mob.

Among the prospective American exhibitors are many Hebrew merchants and manufacturers, and some of them perhaps fear that so long as anti-Semitic hatred might influence France to the defeat of equity and honor and national dignity their lives and property might not be safe from actual violence should the mob leaders undertake for any sinister purpose to stir up the enmity of the riffraff of Paris against them. The question also arose, would any French judge of exhibits venture to award a prize to a Hebrew rival of a Gaelic exhibitor in a city whose dead walls are plastered with placards like these: "Down with the Jew!" "Buy nothing from a Jew!" "Spit on the Jews!" "Death to the Jews!"

Then, again, prospective exhibitors, who are not Hebrews, were worried at first by the knowledge that many Hebrews are determined fighters, full of grit and courage, and the fiercer the hatred of them grows and the more their enemies threaten, the more determined they would become to display their wares at that very exhibition and carry off as many prizes as possible. Therefore, it could be depended upon, they imagine, that some Hebrew would provide that identical form of provocation for the French Jew baiters which nervous exhibitors most dreaded, and if a Paris mob should once begin to vent its spite upon the exhibits of Hebrews, it would not stop to discriminate. Moreover, anarchists, who love destruction for destruction's sake, and form a large part of every Paris mob, might be expected to see that no discrimination was made, but that all they could reach mingled in one red ruin.

These are some of the uncomfortable thoughts which, when the Dreyfus verdict was first announced, disturbed the minds of many Americans who had already gone to considerable expense in preparing for the exhibition. One of the largest items of their expense, so far, has been the outlay for showcases. Many thousands of dollars have been already laid out in this way alone. No expense has been spared to make the showcases handsome, striking and especially adapted in their shape to display goods to the best advantage in the somewhat circumscribed space allotted for the exhibition purposes. Many Americans have caused special goods to be manufactured for the Paris World's fair, and to withdraw their exhibits now would entail a loss, but that loss at this early stage of the scheme would be light, they thought, compared with what might happen if a raging anti-Semitic mob should start a riot in Paris while the exhibition was going on and while the only force that could be trusted to maintain order was an army, some of whose generals were corrupt, and a police force that would allow a single Guerin to defy it and make a laughing stock of it before the whole world, for weeks and weeks together.

But cool reflection has led Americans to take a more hopeful view of the situation. They see that France has so much to lose by a failure of her exhibition and so much to gain in this and countless other ways by restoring justice to her proper pedestal and by humiliating those who would make a mock of her before the world that it seems to be impossible that she should not take the necessary steps to set herself right before all the civilized nations. The exhibition is still a considerable way off, and a few weeks, even a few days, may make an entire change in the fate of Dreyfus and the condition of his persecutors. If France does take steps toward that end, would exhibitors feel that the Paris fair

will be a great success; and no anger will accrue to foreign exhibitors or visitors, no matter what their race or religion may be. Interviews with the agents of steamship companies show that they are already booking passengers for 1900 at a rate which threatens to make a big fleet of extra steamships necessary, and inquiry at the office of Commissioner General Peck shows that no exhibitor has given up his allotted space. The success of the fair is in France's own hands now, and Americans are hopeful that she will know how to preserve it.

FRANCE AND HER FAIR.

Effect of the Dreyfus Case on the Exposition.

MANY HEBREWS REVENGEFUL.

Will France Be Able to Re-establish Herself in the Eyes of the World? American Exhibitors Disposed to Be Conservative.

The storm of public protest against the Dreyfus decision, which has swept over America with more force, perhaps, than anywhere else, aroused at first grave doubts in the minds of many who intended to visit or exhibit at the Paris exposition of 1900 whether they might not better reconsider their plans. On the part of exhibitors, says the New York Tribune, the question was doubly important. They asked themselves whether the outraged feelings which have been aroused all over the world by the iniquitous Dreyfus decision might not keep so many visitors away from the exposition that it would hardly be worth while to display their goods. They were also conjecturing whether a country which might possibly submit to having its temple of justice turned into a moral shambles by a clique of army generals would be able to guarantee the safety of the goods to be exhibited from the incendiarism of an always possible Paris mob.

Among the prospective American exhibitors are many Hebrew merchants and manufacturers, and some of them perhaps fear that so long as anti-Semitic hatred might influence France to the defeat of equity and honor and national dignity their lives and property might not be safe from actual violence should the mob leaders undertake for any sinister purpose to stir up the enmity of the riffraff of Paris against them. The question also arose, would any French judge of exhibits venture to award a prize to a Hebrew rival of a Gaelic exhibitor in a city whose dead walls are plastered with placards like these: "Down with the Jews!" "Buy nothing from a Jew!" "Spit on the Jews!" "Death to the Jews!"

Then, again, prospective exhibitors, who are not Hebrews, were worried at first by the knowledge that many Hebrews are determined fighters, full of grit and courage, and the fiercer the hatred of them grows and the more their enemies threaten, the more determined they would become to display their wares at that very exhibition and carry off as many prizes as possible. Therefore, it could be depended upon, they imagine, that some Hebrew would provide that identical form of provocation for the French Jew baiters which nervous exhibitors most dreaded, and if a Paris mob should once begin to vent its spite upon the exhibits of Hebrews, it would not stop to discriminate. Moreover, anarchists, who love destruction for destruction's sake, and form a large part of every Paris mob, might be expected to see that no discrimination was made, but that all they could reach mingled in one red ruin.

These are some of the uncomfortable thoughts which, when the Dreyfus verdict was first announced, disturbed the minds of many Americans who had already gone to considerable expense in preparing for the exhibition. One of the largest items of their expense, so far, has been the outlay for showcases. Many thousands of dollars have been already laid out in this way alone. No expense has been spared to make the showcases handsome, striking and especially adapted in their shape to display goods to the best advantage in the somewhat circumscribed space allotted for the exhibition purposes. Many Americans have caused special goods to be manufactured for the Paris World's fair, and to withdraw their exhibits now would entail a loss, but that loss at this early stage of the scheme would be light, they thought, compared with what might happen if a raging anti-Semitic mob should start a riot in Paris while the exhibition was going on and while the only force that could be trusted to maintain order was an army, some of whose generals were corrupt, and a police force that would allow a single Guerin to defy it and make a laughing stock of it before the whole world, for weeks and weeks together.

But cool reflection has led Americans to take a more hopeful view of the situation. They see that France has so much to lose by a failure of her exhibition and so much to gain in this and countless other ways by restoring justice to her proper pedestal and by humiliating those who would make a mock of her before the world that it seems to be impossible that she should not take the necessary steps to set herself right before all the civilized nations. The exhibition is still a considerable way off, and a few weeks, even a few days, may make an entire change in the fate of Dreyfus and the condition of his persecutors. If France does take steps toward that end, would exhibitors feel that the Paris fair

will be a great success, and no longer will accrue to foreign exhibitors or visitors, no matter what their race or religion may be. Interviews with the agents of steamship companies show that they are already booking passengers for 1900 at a rate which threatens to make a big fleet of extra steamships necessary, and inquiry at the office of Commissioner General Peck shows that no exhibitor has given up his allotted space. The success of the fair is in France's own hands now, and Americans are hopeful that she will know how to preserve it.

For rates, tickets, time of trains and other details about the reduced fares, please apply to the nearest ticket agent of the Pennsylvania lines.

DEWEY RECEPTION EXCURSIONS.

Low Fares to New York and Washington via Pennsylvania Lines.

For the Admiral Dewey receptions at New York Sept. 29 and 30, and at Washington Oct. 2, special excursion tickets of the open form which does not require signature will be sold from principal stations on the Pennsylvania lines.

New York excursion tickets will be sold Sept. 26, 27 and 28, and will be good to return leaving New York or Washington not later than Oct. 4. They will be honored returning within their limit either via direct line or via Washington.

Washington excursion tickets will be sold Sept. 30 and Oct. 1, and will be good to return leaving Washington not later than Oct. 6.

For tickets, information about rates, time of through trains and other details, apply to nearest ticket agent of Pennsylvania lines.

Vacation Trips.

The Pennsylvania lines extend direct to places of summer sojourn along the Atlantic Ocean. Atlantic City, Cape May, Asbury Park Long Branch and resorts on the New Jersey coast are seashore terminals of the Pennsylvania system. Newport, Narragansett and summer havens in New England are reached over the Pennsylvania route via New York. The Adirondacks, White Mountains, Catskills and mountain retreats of the east are also reached through New York. Resorts in the Alleghenies are located upon the Pennsylvania route and may be reached via Pittsburg without changing car. The Pennsylvania lines also lead to resorts in Michigan and the lake region through three gateways: Cleveland, Toledo and Fort Wayne. Full information about rates, through time of trains and the convenient manner in which summer resorts may be reached will be cheerfully furnished upon application to local passenger and ticket agents of the Pennsylvania lines, or by addressing J. K. Dillon, P. M. Agt., Pittsburg Pa.

FINE JOB WORK.

The News rooms are the best equipped in eastern Ohio, and we are consequently able to turn out large quantities of work on short notice.

UNION LABELS.

It should be a deep-rooted principle of all union workmen and union sympathizers, and particularly those members of the different organizations of East Liverpool, to buy nothing but Union Label goods, in preference to all others. And why not? If we ask fair wages for our labor, why should we buy goods made at unfair wages by others?

The Union Label in every industry is a guarantee of fair wages, decent working hours, and union labor employed.

UNION PAPERS.

All Union papers of East Liverpool are known to the various craft and unions of the city by the printing of the above Union Labels at the head of their columns.

PATRONIZE UNION CLERKS.

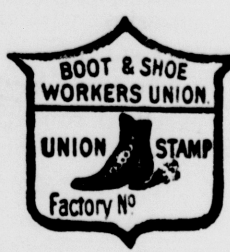

All members of the R. C. N. P. A. can show this card ask for it when making your purchases. Ensured by the A. F. of L.

COLOR IS CHANGED EACH QUARTER. Goods only during months named in lower left hand corner and are properly signed, and STAMPED with the number of the Local.

UNION MADE BOOTS AND SHOES.

The Boot and Shoe Workers' union is the national head of the trade, and is a new combination of all the branches of boot and shoe workers. The above trade-mark which is found on the sole or lining of a boot or shoe, is a guarantee that the same is made by union labor. Look for the above design stamped in the sole of every pair of boots or shoes you buy.

## FOOD FOR THE SOLDIERS

### Government Sending Emergency Rations to the Philippines.

#### A LIGHT DIET IS DIRECTED.

**Big Refrigerating Plant Is to Be Constructed at Manila—Ice For Uncle Sam's Troops—How Food Is Shipped to the Orient.**

Just by way of experiment the war department is sending to Manila 25,000 pounds of a new kind of emergency ration. It is stuff that comes in one pound cans and is understood to be composed of meat and vegetables, desiccated so as to be extremely compact and highly condensed. When wanted for eating, it is crumbled in a pint of cold water and boiled five minutes, the result being a thick and nutritious porridge. The latter, when cold, may be sliced for frying, like mush. Professors Chittenden of Yale and Atwater of Wesleyan have analyzed the substance and commended it strongly.

Much meat being undesirable as food for troops in so torrid a climate as that of the Philippines, the subsistence bureau of the army is trying to introduce lighter articles of diet for consumption by Yankee soldiers in the eastern archipelago. Dried boneless codfish by the ton is being shipped from Boston to Manila, and pickled whitefish and other fishes in brine are being forwarded likewise, not to mention large quantities of canned salmon. These are furnished to the boys in "khaki" in place of beef or pork to a considerable extent, the daily allowance for one man being 14 ounces of codfish or 16 ounces of canned salmon or 18 ounces of pickled fish. Two ounces of prunes or dried apples or evaporated peaches are supplied also as part of the regular ration for health's sake.

The war department is most anxious to hurry up the building of the proposed refrigerating and ice-making plant at Manila, and everything will be done to hasten its construction. Too much emphasis cannot be laid on the importance of this enterprise in its reference to the health and welfare of the American troops, and great regret is felt that it is not already completed and in operation. A contract was awarded to a New York firm the other day for the ice-making machinery, which will be shipped to the Philippines as soon as it can be got ready. The structure that is to house it has not been begun as yet, but it will stand on the south side of the Pasig river, between the Espana bridge and the suspension bridge.

The plant will be on an immense scale, as may be judged from the fact that space will be provided for hanging 1,200 tons of beef and 200 tons of mutton. If desired, one-half of this vast quantity may be kept chilled, while the other half will be held frozen at 12 degrees Fahrenheit. The refrigeration will be accomplished in the ordinary manner, by the expansion of ammonia gas manufactured on the premises. Ice will be turned out at a wonderful rate—nearly 100,000 pounds every 24 hours, or more than two pounds per diem for every officer and man in the army. Imagine what a comfort it will be in that tropical climate! But the ice-making apparatus will occupy only a small part of the building, relatively speaking.

The building itself will be severely plain, being designed rather for utility than for architectural effect. Through it, from end to end, will run a driveway, with platforms on either side for loading wagons. On the left of this driveway, as one enters, will be a room 128 by 32 feet, to hold 50 tons of butter and 100 tons of bacon. The rest of the lower floor on that side will be occupied by four rooms equally large for beef. On the right hand side of the driveway will be offices, elevators, a great room for the storage of ice, the machine room and an ice-making room 100 feet square, the floor of which last will be composed of a series of long and narrow tanks, sheathed inside with iron plates and filled with filtered water. Behind the plates will run coils of pipes, through which expanding ammonia gas will flow, freezing the water in the tanks into solid blocks.

On the second floor of the building will be five huge rooms, four of them for beef and one for mutton, while the space over the driveway will be devoted to the storage of canned goods, potatoes and onions. In short, the building will be commodious enough to house provisions for the entire American army of 40,000 men—the number at present contemplated—in the Philippines. The quantity of beef mentioned will furnish no fewer than 2,016,000 full rations, allowing a pound and a quarter a day to each soldier, and will feed all the Yankee troops 50 days without renewing the supply. The mutton will yield 336,000 rations, or more than eight days' allowance. As for potatoes and onions, enough will be kept on hand to last the forces a week. Ordinarily each fighting man gets a pound of vegetables per diem, and of these potatoes and onions make up 70 per cent.

All of the fresh beef and fresh mutton for the troops in the Philippines

comes from Australia, whence it is brought to Manila in a frozen condition by steamers. There is now fitting out in New York a cold storage vessel, provided with everything that is the latest in the way of refrigerating apparatus, which will shortly proceed to the eastern seas and take up this business of meat transportation for the government, plying between the island continent and Luzon. Some of the potatoes and onions for the soldiers come from Australia also, though most of them are shipped from San Francisco. Pork, ham and bacon are furnished to the army by Chicago packers. Peas and beans are forwarded mainly from St. Louis and Chicago. In view of the importance of this military trade, lines of steamers are being established at New York to follow the route via the Suez canal.

It is likely that after our troops have been for a longer time in the newly acquired archipelago they will eat more rice than they do now. That cereal is grown in immense quantities in the neighborhood of Manila, the fields being under water in the rainy season, and it is specially in favor with people that inhabit tropical regions. Soldiers do not of necessity require meat to fight on, as is illustrated by the fact that when those husky warriors, the Scotch highlanders, invaded England each man of them carried on his back 50 pounds of oatmeal, which in camp he cooked in his own iron cap. If, by the way, our men knew how easily a palatable whisky, known in the east as "saki," or "rice brandy," could be distilled from rice with simple apparatus, there would probably be a good deal more drunkenness in the army. An advantage that rice has for army use is that it is a highly condensed food—a sort of natural emergency ration, extremely nutritious and portable in small bulk.

The new emergency food referred to, of which 25,000 one pound cans are on their way to Manila, is composed of such ingredients as to supply all the needs of the body. So, at all events, say Professors Atwater and Chittenden. It furnishes fuel to keep the fighting man a-going and "protein" to make blood and tissue. One can is a complete ration for one man for one day. To make it satisfactory in all respects each can contains, in addition to the food cake, a tablet of sweetened tea, guaranteed to make, with boiling water, four quarts of strong infusion. The soldier is expected to break it into four equal parts, thus providing himself a plentiful allowance of the cheering beverage four times a day.

#### "HELLO," SAID LILLIAN.

**The Prima Donna Reminds Comedian Kelly of Old Days.**

When Lillian Russell and John T. Kelly met for rehearsals of "The Whirligig" at Weber & Fields' Music hall in New York a few days ago, says The World, it was the first time they had come within speaking distance of each other in 15 years. Both were members of Tony Pastor's company at Pastor's old theater in the seventies.

Kelly was at a loss to know whether or not he ought to step up and greet the prima donna. He decided that he would and started forward. Then he changed his mind and stopped.

At that moment Miss Russell looked across the stage and saw him. She promptly marched forward and held out her hand.

"Hello, John!" she said. "Do you remember me?"

"Well, rather!" answered Kelly. "You didn't think I'd forgotten the days down at Pastor's, did you? You sang in the chorus, and I did Dick Deadeye in 'Pinafore.'"

"Kelly," said Miss Russell, "your memory is getting bad in your old age. We played together before that. See if you can't think when it was."

Kelly thought. Then he shook his head. "Can't recall it," he added.

"Why, yes. Don't you know? You did an afterpiece for the variety show, and my sister and I walked on and off in it to impersonate the crowd. That was in—let's see—no, I guess I won't say when. A woman is as old as she looks, you know."

#### PORTO RICO'S COFFEE.

**The Tariff Modified to Help the Island Planters.**

Secretary Root has directed an order providing that Porto Rico coffee be admitted duty free into Cuba. The secretary has refused to adopt the suggestion that the tobacco of Porto Rico be also admitted duty free into Cuba.

The secretary has taken this action in order to assist Porto Rican planters who suffered by the recent hurricane.

"The coffee industry," said Secretary Root, "is the most important in Porto Rico. The latest annual valuation of the Porto Rico crops is about \$18,000,000, and \$12,000,000 of this amount represents the coffee crop. About one-third of the coffee goes to Cuba, on which the tariff is \$12.50 per 100 kilograms, and the removal of this duty will be of material advantage to the Porto Rican planters.

"The free importation of tobacco into Cuba could not be granted. Tobacco is a Cuban crop, and, besides, a great many people have recently invested money in the tobacco industry in Cuba."

This modification of the tariff, Secretary Root says, applies only to Porto Rico and Cuba.

## TRADE OF PHILIPPINES.

### The Report of the British Consul at Manila.

#### GIVES SOME SIGNIFICANT FIGURES.

**Exports from the Archipelago and the Countries to Which They Go. United States and Great Britain the Principal Markets.**

The trade of the Philippines in 1898 is discussed by a report of the British consul at Manila, just received by the treasury bureau of statistics. He opens his report by saying: "Notwithstanding that for the moment all commercial enterprise is paralyzed there is abundant evidence that when peace and a settled form of government are well established the future prosperity of the Philippines will far exceed the past. The climate of Manila, as far as I have yet experienced it, is similar to all tropical climates, and the health of Europeans depends principally upon themselves. The town of Manila, which is of great extent, has the disadvantage of being only eight or ten feet above the sea level, and as the natives have hitherto been taught to regard all sanitary projects as useless there is heavy work in the task of draining, etc., and heavier still in persuading the Filipino that such measures are necessary."

Discussing the commerce of the Philippines, the report shows something of a falling off in the year 1898, due to the disturbed conditions, but shows the exports of sugar in 1898 to be 177,695 tons, against 202,092 in 1897, of which four-fifths were from the island of Iloilo, though in 1897 only about two-thirds of the sugar exports were from Iloilo. The exportation of hemp in 1898 falls but little below that of 1897, two-thirds of the amount being from the island of Iloilo and the remainder from Cebu.

The figures showing the exportation of sugar from Iloilo for a long term of years are interesting and suggestive. They show that the exportation of sugar from Iloilo in 1859 was 86,832 piculs (picul equals 133 1-3 pounds); in 1869, 117,508; in 1879, 762,004; in 1889, 1,792,119; in 1896, 1,994,378; in 1897, 2,088,672, and in 1898, 2,470,432.

Regarding trade prospects in the Philippines, the British vice consul at Iloilo, Mr. Fyfe, says: "The preferential tariff hitherto enjoyed by Spanish goods, and which was rapidly diverting this trade to Barcelona, being now abolished, competition from that quarter should scarcely be possible any longer. Notwithstanding the disturbed state of the country business has been well up to the average, several of the neighboring islands and provinces which have hitherto drawn their supplies from Manila having had to buy in this market during the blockade of the former port. Owing to the uncertainty of the future fresh arrivals of goods have been on a much reduced scale, so that stocks today in the importer's hands are exceptionally light. The import of petroleum this year has been very small, only 30,000 cases, 74,000 cases being the import in 1897. This is accounted for by the falling off in consumption among the principal classes on account of the high price and also on account of large stocks held over from the previous year. On account of the unsettled state of affairs in the whole group of the Philippine Islands the sale of new milling plant has been almost nothing."

That the Philippines are likely to become of much greater value with a diversification and development of industries along the lines suggested by the requirements of the markets of the temperate zones is indicated by Vice Consul Fyfe, who says:

"The final decision of the present crisis is now anxiously awaited, and time will show if these rich islands do not in the future produce many other products which have never been developed or cultivated." This suggestion is especially interesting taken in connection with a single item in the table of the principal exports of the Philippines given below. This item is indigo, and while it shows a comparatively small exportation of this article, 66,584 pounds in 1897, it suggests the possibilities as to an increase in the production of an article whose export value from India has for years ranged from \$6,000,000 upward.

The following tables from the report of the British consul show the principal exports of 1897 and 1898 and their destination:

"I feel that I owe a debt of gratitude to you for preparing such grand remedies, for chronic diseases especially, which the doctors failed to reach," writes L. B. Staples, Esq., of Barclay, Osage Co., Kans. "I am a railroad agent, and four years ago my work keeping me in a warm room and stepping out frequently into the cold air gave me bronchitis, which became chronic and deep seated. Doctors failed to reach my case and advised me to try a higher air, but, fortunately for me, a friend also advised me to try Dr. Pierce's medicines. I commenced taking your 'Golden Medical Discovery,' and by the time I had taken the first bottle I was better, and after taking about four bottles my cough was entirely gone. ### Mohammedanism in British Africa.

Reports from British West Africa are to the effect that the natives are rapidly becoming converts to the faith of Islam, while Christianity is making small progress. The British colonial office reports that this change in faith has a splendid influence on the natives. Drunkenness is on the decrease, and there is great improvement in other directions.

### Novel Cure For Inebriety.

Recently the Indians on the Jackson county reservation, in Kansas, engaged in their annual green corn dance, a ceremonial that is religious in its character, so, among other prohibitions, drunkenness is not allowed. However, one of the bucks tried to get on the pavilion at one of the services when he was plainly not in a fit condition. He was ordered away, but would not go, whereupon he was taken in charge by a couple of guards, who applied a new kind of cure for drunkenness that was rough but efficacious. His hands were tied behind him, his legs tied to the post, and then pulled up behind him until they reached his hands, and they were all tied together. He was then carried to the shade of a tree, where he was thrown to the ground like a stick of wood and left to lie there until he could sober up and learn something in the bargain. When his hands were untied he was as decent as could be. A few such treatments usually cure the worst cases, and they don't disturb the dancers any more.

### It Has Been Noticed.

"What's that?"

"The man who writes just to keep the pot boiling is not the one who produces the hottest stuff."—Chicago Times-Herald.

FOOD FOR THE SOLDIERS

Government Sending Emergency Rations to the Philippines.

A LIGHT DIET IS DIRECTED.

Big Refrigerating Plant Is to Be Constructed at Manila—Ice For Uncle Sam's Troops—How Food Is Shipped to the Orient.

Just by way of experiment the war department is sending to Manila 25,000 pounds of a new kind of emergency ration. It is stuff that comes in one pound cans and is understood to be composed of meat and vegetables, desiccated so as to be extremely compact and highly condensed. When wanted for eating, it is crumbled in a pint of cold water and boiled five minutes, the result being a thick and nutritious porridge. The latter, when cold, may be sliced for frying, like mush. Professors Chittenden of Yale and Atwater of Wesleyan have analyzed the substance and commended it strongly.

Much meat being undesirable as food for troops in so torrid a climate as that of the Philippines, the subsistence bureau of the army is trying to introduce lighter articles of diet for consumption by Yankee soldiers in the eastern archipelago. Dried boneless codfish by the ton is being shipped from Boston to Manila, and pickled whitefish and other fishes in brine are being forwarded likewise, not to mention large quantities of canned salmon. These are furnished to the boys in "khaki" in place of beef or pork to a considerable extent, the daily allowance for one man being 14 ounces of codfish or 16 ounces of canned salmon or 18 ounces of pickled fish. Two ounces of prunes or dried apples or evaporated peaches are supplied also as part of the regular ration for health's sake.

The war department is most anxious to hurry up the building of the proposed refrigerating and ice-making plant at Manila, and everything will be done to hasten its construction. Too much emphasis cannot be laid on the importance of this enterprise in its reference to the health and welfare of the American troops, and great regret is felt that it is not already completed and in operation. A contract was awarded to a New York firm the other day for the ice-making machinery, which will be shipped to the Philippines as soon as it can be got ready. The structure that is to house it has not been begun as yet, but it will stand on the south side of the Pasig river, between the Espana bridge and the suspension bridge.

The plant will be on an immense scale, as may be judged from the fact that space will be provided for hanging 1,200 tons of beef and 200 tons of mutton. If desired, one-half of this vast quantity may be kept chilled, while the other half will be held frozen at 12 degrees Fahrenheit. The refrigeration will be accomplished in the ordinary manner, by the expansion of ammonia gas manufactured on the premises. Ice will be turned out at a wonderful rate—nearly 100,000 pounds every 24 hours, or more than two pounds per diem for every officer and man in the army. Imagine what a comfort it will be in that tropical climate! But the ice-making apparatus will occupy only a small part of the building, relatively speaking.

The building itself will be severely plain, being designed rather for utility than for architectural effect. Through it, from end to end, will run a driveway, with platforms on either side for loading wagons. On the left of this driveway, as one enters, will be a room 128 by 32 feet, to hold 50 tons of butter and 100 tons of bacon. The rest of the lower floor on that side will be occupied by four rooms equally large for beef. On the right hand side of the driveway will be offices, elevators, a great room for the storage of ice, the machine room and an ice-making room 100 feet square, the floor of which last will be composed of a series of long and narrow tanks, sheathed inside with iron plates and filled with filtered water. Behind the plates will run coils of pipes, through which expanding ammonia gas will flow, freezing the water in the tanks into solid blocks.

On the second floor of the building will be five huge rooms, four of them for beef and one for mutton, while the space over the driveway will be devoted to the storage of canned goods, potatoes and onions. In short, the building will be commodious enough to house provisions for the entire American army of 40,000 men—the number at present contemplated—in the Philippines. The quantity of beef mentioned will furnish no fewer than 2,016,000 full rations, allowing a pound and a quarter a day to each soldier, and will feed all the Yankee troops 50 days without renewing the supply. The mutton will yield 336,000 rations, or more than eight days' allowance. As for potatoes and onions, enough will be kept on hand to last the forces a week. Ordinarily each fighting man gets a pound of vegetables per diem, and of these potatoes and onions make up 70 per cent.

All of the fresh beef and fresh mutton for the troops in the Philippines

comes from Australia, whence it is brought to Manila in a frozen condition by steamers. There is now fitting out in New York a cold storage vessel, provided with everything that is the latest in the way of refrigerating apparatus, which will shortly proceed to the eastern seas and take up this business of meat transportation for the government, plying between the island continent and Luzon. Some of the potatoes and onions for the soldiers come from Australia also, though most of them are shipped from San Francisco. Pork, ham and bacon are furnished to the army by Chicago packers. Peas and beans are forwarded mainly from St. Louis and Chicago. In view of the importance of this military trade, lines of steamers are being established at New York to follow the route via the Suez canal.

It is likely that after our troops have been for a longer time in the newly acquired archipelago they will eat more rice than they do now. That cereal is grown in immense quantities in the neighborhood of Manila, the fields being under water in the rainy season, and it is especially in favor with people that inhabit tropical regions. Soldiers do not of necessity require meat to fight on, as is illustrated by the fact that when those husky warriors, the Scotch highlanders, invaded England each man of them carried on his back 50 pounds of oatmeal, which in camp he cooked in his own iron cap. If, by the way, our men knew how easily a palatable whisky, known in the east as "saki," or "rice brandy," could be distilled from rice with simple apparatus, there would probably be a good deal more drunkenness in the army. An advantage that rice has for army use is that it is a highly condensed food—a sort of natural emergency ration, extremely nutritious and portable in small bulk.

The new emergency food referred to, of which 25,000 one pound cans are on their way to Manila, is composed of such ingredients as to supply all the needs of the body. So, at all events, say Professors Atwater and Chittenden. It furnishes fuel to keep the fighting man a-going and "protein" to make blood and tissue. One can is a complete ration for one man for one day. To make it satisfactory in all respects each can contains, in addition to the food cake, a tablet of sweetened tea, guaranteed to make, with boiling water, four quarts of strong infusion. The soldier is expected to break it into four equal parts, thus providing himself a plentiful allowance of the cheering beverage four times a day.

"HELLO," SAID LILLIAN.

The Prima Donna Reminds Comedian Kelly of Old Days.

When Lillian Russell and John T. Kelly met for rehearsals of "The Whirligig" at Weber & Fields' Music hall in New York a few days ago, says The World, it was the first time they had come within speaking distance of each other in 15 years. Both were members of Tony Pastor's company at Pastor's old theater in the seventies.

Kelly was at a loss to know whether or not he ought to step up and greet the prima donna. He decided that he would and started forward. Then he changed his mind and stopped.

At that moment Miss Russell looked across the stage and saw him. She promptly marched forward and held out her hand.

"Hello, John!" she said. "Do you remember me?"

"Well, rather," answered Kelly. "You didn't think I'd forgotten the days down at Pastor's, did you? You sang in the chorus, and I did Dick Deadeye in 'Pinafore'."

"Kelly," said Miss Russell, "your memory is getting bad in your old age. We played together before that. See if you can't think when it was."

Kelly thought. Then he shook his head. "Can't recall it," he added.

"Why, yes. Don't you know? You did an afterpiece for the variety show, and my sister and I walked on and off in it to impersonate the crowd. That was in—let's see—no, I guess I won't say when. A woman is as old as she looks, you know."

PORTO RICO'S COFFEE.

The Tariff Modified to Help the Island Planters.

Secretary Root has directed an order providing that Porto Rico coffee be admitted duty free into Cuba. The secretary has refused to adopt the suggestion that the tobacco of Porto Rico be also admitted duty free into Cuba.

The secretary has taken this action in order to assist Porto Rican planters who suffered by the recent hurricane.

"The coffee industry," said Secretary Root, "is the most important in Porto Rico. The latest annual valuation of the Porto Rico crops is about \$18,000,000, and \$12,000,000 of this amount represents the coffee crop. About one-third of the coffee goes to Cuba, on which the tariff is \$12.50 per 100 kilograms, and the removal of this duty will be of material advantage to the Porto Rican planters.

"The free importation of tobacco into Cuba could not be granted. Tobacco is a Cuban crop, and, besides, a great many people have recently invested money in the tobacco industry in Cuba."

This modification of the tariff, Secretary Root says, applies only to Porto Rico and Cuba.

TRADE OF PHILIPPINES.

The Report of the British Consul at Manila.

GIVES SOME SIGNIFICANT FIGURES.

Exports From the Archipelago and the Countries to Which They Go. United States and Great Britain the Principal Markets.

The trade of the Philippines in 1898 is discussed by a report of the British consul at Manila, just received by the treasury bureau of statistics. He opens his report by saying: "Notwithstanding that for the moment all commercial enterprise is paralyzed there is abundant evidence that when peace and a settled form of government are well established the future prosperity of the Philippines will far exceed the past. The climate of Manila, as far as I have yet experienced it, is similar to all tropical climates, and the health of Europeans depends principally upon themselves. The town of Manila, which is of great extent, has the disadvantage of being only eight or ten feet above the sea level, and as the natives have hitherto been taught to regard all sanitary projects as useless there is heavy work in the task of draining, etc., and heavier still in persuading the Filipino that such measures are necessary."

Discussing the commerce of the Philippines, the report shows something of a falling off in the year 1898, due to the disturbed conditions, but shows the exports of sugar in 1898 to be 177,635 tons, against 202,092 in 1897, of which four-fifths were from the island of Iloilo, though in 1897 only about two-thirds of the sugar exports were from Iloilo. The exportation of hemp in 1898 falls but little below that of 1897, two-thirds of the amount being from the island of Iloilo and the remainder from Cebu.

The figures showing the exportation of sugar from Iloilo for a long term of years are interesting and suggestive. They show that the exportation of sugar from Iloilo in 1859 was \$6,832 piculs (picul equals 133 1-3 pounds); in 1869, 117,508; in 1879, 762,004; in 1889, 1,792,119; in 1896, 1,994,378; in 1897, 2,088,672, and in 1898, 2,470,432.

Regarding trade prospects in the Philippines, the British vice consul at Iloilo, Mr. Fyfe, says: "The preferential tariff hitherto enjoyed by Spanish goods, and which was rapidly diverting this trade to Barcelona, being now abolished, competition from that quarter should scarcely be possible any longer. Notwithstanding the disturbed state of the country business has been well up to the average, several of the neighboring islands and provinces which have hitherto drawn their supplies from Manila having had to buy in this market during the blockade of the former port. Owing to the uncertainty of the future fresh arrivals of goods have been on a much reduced scale, so that stocks today in the importer's hands are exceptionally light. The import of petroleum this year has been very small, only 30,000 cases, 74,000 cases being the import in 1897. This is accounted for by the falling off in consumption among the principal classes on account of the high price and also on account of large stocks held over from the previous year. On account of the unsettled state of affairs in the whole group of the Philippine Islands the sale of new milling plant has been almost nothing."

That the Philippines are likely to become of much greater value with a diversification and development of industries along the lines suggested by the requirements of the markets of the temperate zones is indicated by Vice Consul Fyfe, who says:

"The final decision of the present crisis is now anxiously awaited, and time will show if these rich islands do not in the future produce many other products which have never been developed or cultivated." This suggestion is especially interesting taken in connection with a single item in the table of the principal exports of the Philippines given below. This item is indigo, and while it shows a comparatively small exportation of this article, 66,584 pounds in 1897, it suggests the possibilities as to an increase in the production of an article whose export value from India has for years ranged from \$6,000,000 upward.

The following tables from the report of the British consul show the principal exports of 1897 and 1898 and their destination:

## FOOD FOR THE SOLDIERS

Government Sending Emergency Rations to the Philippines.

A LIGHT DIET IS DIRECTED.

Big Refrigerating Plant Is to Be Constructed at Manila—Ice For Uncle Sam's Troops—How Food Is Shipped to the Orient.

Just by way of experiment the war department is sending to Manila 25,000 pounds of a new kind of emergency ration. It is stuff that comes in one pound cans and is understood to be composed of meat and vegetables, desiccated so as to be extremely compact and highly condensed. When wanted for eating, it is crumbled in a pint of cold water and boiled five minutes, the result being a thick and nutritious porridge. The latter, when cold, may be sliced for frying, like mush. Professors Chittenden of Yale and Atwater of Wesleyan have analyzed the substance and commended it strongly.

Much meat being undesirable as food for troops in so torrid a climate as that of the Philippines, the subsistence bureau of the army is trying to introduce lighter articles of diet for consumption by Yankee soldiers in the eastern archipelago. Dried boneless codfish by the ton is being shipped from Boston to Manila, and pickled whitefish and other fishes in brine are being forwarded likewise, not to mention large quantities of canned salmon. These are furnished to the boys in "khaki" in place of beef or pork to a considerable extent, the daily allowance for one man being 14 ounces of codfish or 16 ounces of canned salmon or 18 ounces of pickled fish. Two ounces of prunes or dried apples or evaporated peaches are supplied also as part of the regular ration for health's sake.

The war department is most anxious to hurry up the building of the proposed refrigerating and ice-making plant at Manila, and everything will be done to hasten its construction. Too much emphasis cannot be laid on the importance of this enterprise in its reference to the health and welfare of the American troops, and great regret is felt that it is not already completed and in operation. A contract was awarded to a New York firm the other day for the ice-making machinery, which will be shipped to the Philippines as soon as it can be got ready. The structure that is to house it has not been begun as yet, but it will stand on the south side of the Pasig river, between the Espana bridge and the suspension bridge.

The plant will be on an immense scale, as may be judged from the fact that space will be provided for hanging 1,200 tons of beef and 200 tons of mutton. If desired, one-half of this vast quantity may be kept chilled, while the other half will be held frozen at 12 degrees Fahrenheit. The refrigeration will be accomplished in the ordinary manner, by the expansion of ammonia gas manufactured on the premises. Ice will be turned out at a wonderful rate—nearly 100,000 pounds every 24 hours, or more than two pounds per diem for every officer and man in the army. Imagine what a comfort it will be in that tropical climate! But the ice-making apparatus will occupy only a small part of the building, relatively speaking.

The building itself will be severely plain, being designed rather for utility than for architectural effect. Through it, from end to end, will run a driveway, with platforms on either side for loading wagons. On the left of this driveway, as one enters, will be a room 128 by 32 feet, to hold 50 tons of butter and 100 tons of bacon. The rest of the lower floor on that side will be occupied by four rooms equally large for beef. On the right hand side of the driveway will be offices, elevators, a great room for the storage of ice, the machine room and an ice-making room 100 feet square, the floor of which last will be composed of a series of long and narrow tanks, sheathed inside with iron plates and filled with filtered water. Behind the plates will run coils of pipes, through which expanding ammonia gas will flow, freezing the water in the tanks into solid blocks.

On the second floor of the building will be five huge rooms, four of them for beef and one for mutton, while the space over the driveway will be devoted to the storage of canned goods, potatoes and onions. In short, the building will be commodious enough to house provisions for the entire American army of 40,000 men—the number at present contemplated—in the Philippines. The quantity of beef mentioned will furnish no fewer than 2,016,000 full rations, allowing a pound and a quarter a day to each soldier, and will feed all the Yankee troops 50 days without renewing the supply. The mutton will yield 336,000 rations, or more than eight days' allowance. As for potatoes and onions, enough will be kept on hand to last the forces a week. Ordinarily each fighting man gets a pound of vegetables per diem, and of these potatoes and onions make up 70 per cent.

All of the fresh beef and fresh mutton for the troops in the Philippines

comes from Australia, whence it is brought to Manila in a frozen condition by steamers. There is now fitting out in New York a cold storage vessel, provided with everything that is the latest in the way of refrigerating apparatus, which will shortly proceed to the eastern seas and take up this business of meat transportation for the government, plying between the island continent and Luzon. Some of the potatoes and onions for the soldiers come from Australia also, though most of them are shipped from San Francisco. Pork, ham and bacon are furnished to the army by Chicago packers. Peas and beans are forwarded mainly from St. Louis and Chicago. In view of the importance of this military trade, lines of steamers are being established at New York to follow the route via the Suez canal.

It is likely that after our troops have been for a longer time in the newly acquired archipelago they will eat more rice than they do now. That cereal is grown in immense quantities in the neighborhood of Manila, the fields being under water in the rainy season, and it is especially in favor with people that inhabit tropical regions. Soldiers do not of necessity require meat to fight on, as is illustrated by the fact that when those husky warriors, the Scotch highlanders, invaded England each man of them carried on his back 50 pounds of oatmeal, which in camp he cooked in his own iron cap. If, by the way, our men knew how easily a palatable whisky, known in the east as "saki," or "rice brandy," could be distilled from rice with simple apparatus, there would probably be a good deal more drunkenness in the army. An advantage that rice has for army use is that it is a highly condensed food—a sort of natural emergency ration, extremely nutritious and portable in small bulk.

The new emergency food referred to, of which 25,000 one pound cans are on their way to Manila, is composed of such ingredients as to supply all the needs of the body. So, at all events, say Professors Atwater and Chittenden. It furnishes fuel to keep the fighting man a-going and "protein" to make blood and tissue. One can is a complete ration for one man for one day. To make it satisfactory in all respects each can contains, in addition to the food cake, a tablet of sweetened tea, guaranteed to make, with boiling water, four quarts of strong infusion. The soldier is expected to break it into four equal parts, thus providing himself a plentiful allowance of the cheering beverage four times a day.

"HELLO," SAID LILLIAN.

The Prima Donna Reminds Comedian Kelly of Old Days.

When Lillian Russell and John T. Kelly met for rehearsals of "The Whirligig" at Weber & Fields' Music hall in New York a few days ago, says The World, it was the first time they had come within speaking distance of each other in 15 years. Both were members of Tony Pastor's company at Pastor's old theater in the seventies.

Kelly was at a loss to know whether or not he ought to step up and greet the prima donna. He decided that he would and started forward. Then he changed his mind and stopped.

At that moment Miss Russell looked across the stage and saw him. She promptly marched forward and held out her hand.

"Hello, John!" she said. "Do you remember me?"

"Well, rather," answered Kelly. "You didn't think I'd forgotten the days down at Pastor's, did you? You sang in the chorus, and I did Dick Deadeye in 'Pinafore.'"

"Kelly," said Miss Russell, "your memory is getting bad in your old age. We played together before that. See if you can't think when it was."

Kelly thought. Then he shook his head. "Can't recall it," he added.

"Why, yes. Don't you know? You did an afterpiece for the variety show, and my sister and I walked on and off in it to impersonate the crowd. That was in—let's see—no, I guess I won't say when. A woman is as old as she looks, you know."

PORTO RICO'S COFFEE.

The Tariff Modified to Help the Island Planters.

Secretary Root has directed an order providing that Porto Rico coffee be admitted duty free into Cuba. The secretary has refused to adopt the suggestion that the tobacco of Porto Rico be also admitted duty free into Cuba.

The secretary has taken this action in order to assist Porto Rican planters who suffered by the recent hurricane. "The coffee industry," said Secretary Root, "is the most important in Porto Rico. The latest annual valuation of the Porto Rico crops is about \$18,000,000, and \$12,000,000 of this amount represents the coffee crop. About one-third of the coffee goes to Cuba, on which the tariff is \$12.50 per 100 kilograms, and the removal of this duty will be of material advantage to the Porto Rican planters.

"The free importation of tobacco into Cuba could not be granted. Tobacco is a Cuban crop, and, besides, a great many people have recently invested money in the tobacco industry in Cuba."

This modification of the tariff, Secretary Root says, applies only to Porto Rico and Cuba.

## TRADE OF PHILIPPINES.

The Report of the British Consul at Manila.

GIVES SOME SIGNIFICANT FIGURES.

Exports From the Archipelago and the Countries to Which They Go. United States and Great Britain the Principal Markets.

The trade of the Philippines in 1898 is discussed by a report of the British consul at Manila, just received by the treasury bureau of statistics. He opens his report by saying: "Notwithstanding that for the moment all commercial enterprise is paralyzed there is abundant evidence that when peace and a settled form of government are well established the future prosperity of the Philippines will far exceed the past. The climate of Manila, as far as I have yet experienced it, is similar to all tropical climates, and the health of Europeans depends principally upon themselves. The town of Manila, which is of great extent, has the disadvantage of being only eight or ten feet above the sea level, and as the natives have hitherto been taught to regard all sanitary projects as useless there is heavy work in the task of draining, etc., and heavier still in persuading the Filipino that such measures are necessary."

Discussing the commerce of the Philippines, the report shows something of a falling off in the year 1898, due to the disturbed conditions, but shows the exports of sugar in 1898 to be 177,695 tons, against 202,092 in 1897, of which four-fifths were from the island of Hilo, though in 1897 only about two-thirds of the sugar exports were from Hilo. The exportation of hemp in 1898 falls but little below that of 1897, two-thirds of the amount being from the island of Hilo and the remainder from Cebu.

The figures showing the exportation of sugar from Hilo for a long term of years are interesting and suggestive. They show that the exportation of sugar from Hilo in 1859 was 86,832 piculs (picul equals 133 1-3 pounds); in 1869, 117,508; in 1879, 762,004; in 1889, 1,792,119; in 1896, 1,994,378; in 1897, 2,088,672, and in 1898, 2,470,432.

Regarding trade prospects in the Philippines, the British vice consul at Hilo, Mr. Fyfe, says: "The preferential tariff hitherto enjoyed by Spanish goods, and which was rapidly diverting this trade to Barcelona, being now abolished, competition from that quarter should scarcely be possible any longer. Notwithstanding the disturbed state of the country business has been well up to the average, several of the neighboring islands and provinces which have hitherto drawn their supplies from Manila having had to buy in this market during the blockade of the former port. Owing to the uncertainty of the future fresh arrivals of goods have been on a much reduced scale, so that stocks today in the importer's hands are exceptionally light. The import of petroleum this year has been very small, only 30,000 cases, 74,000 cases being the import in 1897. This is accounted for by the falling off in consumption among the principal classes on account of the high price and also on account of large stocks held over from the previous year. On account of the unsettled state of affairs in the whole group of the Philippine Islands the sale of new milling plant has been almost nothing."

That the Philippines are likely to become of much greater value with a diversification and development of industries along the lines suggested by the requirements of the markets of the temperate zones is indicated by Vice Consul Fyfe, who says:

"The final decision of the present crisis is now anxiously awaited, and time will show if these rich islands do not in the future produce many other products which have never been developed or cultivated." This suggestion is especially interesting taken in connection with a single item in the table of the principal exports of the Philippines given below. This item is indigo, and while it shows a comparatively small exportation of this article, 66,584 pounds in 1897, it suggests the possibilities as to an increase in the production of an article whose export value from India has for years ranged from \$6,000,000 upward.

The following tables from the report of the British consul show the principal exports of 1897 and 1898 and their destination:

"Doctors failed to reach my case and advised me to try a higher air."

There is no greater irony than a recommendation of change of climate to those whose circumstances make change of climate impossible. How many a sufferer in such a case has wistfully watched the flight of the south-seeking birds, and cried with the Psalmist, "Oh that I had wings." But suppose you can fit the lungs to the climate instead of fitting the climate to the lungs. That is what has been found possible by those who have used Dr. Pierce's Golden Medical Discovery. It so purifies the blood, removing the clogged and poisonous conditions favorable to disease, that the whole body is strengthened. With new strength comes new power, and disease is resisted and thrown off.

There is no alcohol, whisky or other intoxicant contained in

Dr. Pierce's Golden Medical Discovery.

"I feel that I owe a debt of gratitude to you for preparing such grand remedies for chronic diseases especially, which the doctors failed to reach," writes E. B. Staples, Esq., of Barclay, Osage Co., Kans. "I am a railroad agent, and four years ago my work keeping me in a warm room and stepping out frequently into the cold air gave me bronchitis, which became chronic and deep seated. Doctors failed to reach my case and advised me to try a higher air, but, fortunately for me, a friend also advised me to try Dr. Pierce's medicines. I commenced taking your 'Golden Medical Discovery,' and by the time I had taken the first bottle I was better, and after taking about four bottles my cough was entirely gone. This was a year ago last winter; and again last winter I took about three bottles to prevent a return of the trouble. I have found no necessity for seeking another climate."

Mohammedanism in British Africa.

Reports from British West Africa are to the effect that the natives are rapidly becoming converts to the faith of Islam, while Christianity is making small progress. The British colonial office reports that this change in faith has a splendid influence on the natives. Drunkenness is on the decrease, and there is great improvement in other directions.

Novel Cure For Inebriety.

Recently the Indians on the Jackson county reservation, in Kansas, engaged in their annual green corn dance, a ceremonial that is religious in its character, so, among other prohibitions, drunkenness is not allowed. However, one of the bucks tried to get on the pavilion at one of the services when he was plainly not in a fit condition. He was ordered away, but would not go, whereupon he was taken in charge by a couple of guards, who applied a new kind of cure for drunkenness that was rough but efficacious. His hands were tied behind him, his legs tied together and then pulled up behind him until they reached his hands, and they were all tied together. He was then carried to the shade of a tree, where he was thrown to the ground like a stick of wood and left to lie there until he could sober up and learn something in the bargain. When his hands were untied he was as decent as could be. A few such treatments usually cure the worst cases, and they don't disturb the dancers any more.

It Has Been Noticed.

"There's a rather queer thing that I have noticed about people who follow the profession of letters."

"What's that?"

"The man who writes just to keep the pot boiling is not the one who produces the hottest stuff."—Chicago Times-Herald.

Dean Swift, when invited to dinner by his friend, Lord Bolingbroke, was shown the dinner bill as an inducement to accept and replied, "A fig for your bill of fare; show me your bill of company."

For the first time in years, the Democratic party had a real issue in 1896. And it still hangs to free silver, though it has been dead nearly three years.

## EGRET FARM PROJECTED.

**Arizona Man Will Raise Birds For Their Feathers.**

A. Bienkowski of Yuma, A. T., has evolved a new scheme whereby he may corral the elusive dollars. He proposes to start an egret farm and conduct the same on the principle of an ostrich farm, says the Yuma Sentinel. The egret is a tropical bird of the heron family and is found in great abundance at the mouth of the Colorado river. It has a white crest, the feathers of which are valued at \$32 an ounce. It has been figured out that 20 birds will yield an ounce of feathers twice a year, or ten birds will yield an ounce of feathers every year, which would be \$32 a year for ten birds.

The birds have been and are being killed for their feathers, and as a consequence they will soon be extinct. Bienkowski proposes to fence 150 acres of marshy land along the river bottom near Yuma and domesticate the egret. He thinks this could be done by clipping their wings. He has several birds in his possession now, and they seem to stand captivity well and are easily tamed. The scheme is feasible.

## Schley's Assignment Important.

WASHINGTON, Sept. 30.—Rear Admiral Wm. L. Scott Schley will succeed Rear Admiral Howison in command of the South Atlantic station. He called upon the president and told him that he had no complaint to make. To the rear admiral's friends the president has said that he regards the station as of great importance, especially at this time, in view of the situation in South Africa and the unsettled condition of affairs in some of the South American countries. The president told Admiral Schley's friends he regarded it as a mark of distinction. Besides, he said it was the only way to gratify the admiral's desire for sea service. It is probable that some additional ships will be assigned to the squadron.

## Pennsylvania Jr. O. U. A. M.

SCRANTON, Pa., Sept. 20.—The state council of the Junior Order United American Mechanics opened its fortieth annual convention here. Councillor Bowers' report called attention particularly to the efforts and methods to increase the membership. Secretary Deemer's report showed that five new councils were instituted and nine reinstated during the year ending Aug. 31, that there were now 750 councils with a membership of 79,396, an increase of 2,675. During the year the state council received \$44,597.07. The receipts of the subordinate councils were \$707,608.87; they have \$935,773.88 invested and \$167,107.50 in their treasury, while \$291,089.65 was paid out for relief and funeral benefits. State Treasurer Calver's report showed a balance of \$5,982.52 in the treasury of the state council.

## Satisfactory Test of Armor.

WASHINGTON, Sept. 20.—A number of Russian and American naval officers were to the Indianhead proving grounds to witness the test of Krupp armor plate, representing a large quantity of the armor of the Russian battleship now building at the Cramp yards in Philadelphia. Admiral O'Neil's observations were with a view to presenting the matter to congress in connection with the question of furnishing armor for the new United States battleships and armored cruisers. The officials of both countries regarded the test as highly satisfactory.

## Successors to Cornelius Vanderbilt.

SCRANTON, Pa., Sept. 20.—The state council of the Junior Order United American Mechanics opened its fortieth annual convention here. Councillor Bowers' report called attention particularly to the efforts and methods to increase the membership. Secretary Deemer's report showed that five new councils were instituted and nine reinstated during the year ending Aug. 31, that there were now 750 councils with a membership of 79,396, an increase of 2,675. During the year the state council received \$44,597.07. The receipts of the subordinate councils were \$707,608.87; they have \$925,773.88 invested and \$167,071.50 in their treasury, while \$291,089.65 was paid out for relief and funeral benefits. State Treasurer Calver's report showed a balance of \$5,982.52 in the treasury of the state council.

## Satisfactory Test of Armor.

WASHINGTON, Sept. 20.—A number of Russian and American naval officers went to the Indianhead proving grounds to witness the test of Krupp armor plate, representing a large quantity of the armor of the Russian battleship now building at the Cramp yards in Philadelphia. Admiral O'Neil's observations were with a view to presenting the matter to congress in connection with the question of furnishing armor for the new United States battleships and armored cruisers. The officials of both countries regarded the test as highly satisfactory.

## Successors to Cornelius Vanderbilt.

NEW YORK, Sept. 20.—William Rockefeller was elected a member of the board of directors of the New York Central Railroad company, to succeed the late Cornelius Vanderbilt. William K. Vanderbilt succeeds his brother, the late Cornelius Vanderbilt, as president of the New York and Harlem railroad.

## Marines For Dewey Parade.

WASHINGTON, Sept. 20.—To insure a proper representation of the navy during the ceremonies in Washington attending the presentation to Admiral Dewey of the sword awarded to him by congress, Acting Secretary Allen decided to order the gunboats Marietta and Machias to this city. Their marines, those here, and others to be sent here, will make a battalion for the parade.

## Almost Ninety.

Dr. J. H. Sloan has been entertaining his mother, from Pittsburgh, for the past few days. Mrs. Sloan is almost 90 years of age. She is the widow of John Sloan who went with Colonel Black to the Mexican war as a member of an East End, Pittsburgh, company, and was killed in battle. The Sloan family is a patriotic one, all the sons having taken part in the war of the Rebellion.

## EGRET FARM PROJECTED.

**Arizona Man Will Raise Birds For Their Feathers.**

A. Bienkowski of Yuma, A. T., has evolved a new scheme whereby he may corral the elusive dollars. He proposes to start an egret farm and conduct the same on the principle of an ostrich farm, says the Yuma Sentinel. The egret is a tropical bird of the heron family and is found in great abundance at the mouth of the Colorado river. It has a white crest, the feathers of which are valued at \$32 an ounce. It has been figured out that 20 birds will yield an ounce of feathers twice a year, or ten birds will yield an ounce of feathers every year, which would be \$32 a year for ten birds.

The birds have been and are being killed for their feathers, and as a consequence they will soon be extinct. Bienkowski proposes to fence 150 acres of marshy land along the river bottom near Yuma and domesticate the egret. He thinks this could be done by clipping their wings. He has several birds in his possession now, and they seem to stand captivity well and are easily tamed. The scheme is feasible.

## Schley's Assignment Important.

WASHINGTON, Sept. 30.—Rear Admiral Wm. L. Scott Schley will succeed Rear Admiral Howison in command of the south Atlantic station. He called upon the president and told him that he had no complaint to make. To the rear admiral's friends the president has said that he regards the station as of great importance, especially at this time, in view of the situation in South Africa and the unsettled condition of affairs in some of the South American countries. The president told Admiral Schley's friends he regarded it as a mark of distinction. Besides, he said it was the only way to gratify the admiral's desire for sea service. It is probable that some additional ships will be assigned to the squadron.

## DREYFUS TO BE FREE.

Even Now May Be Out of Prison.

### MINISTERS DECIDE ON PARDON.

It Was Reported in Rennes That He Had Already Been Released—May Be Sent Abroad—Fight Against Generals to Continue.

LONDON, Sept. 20.—The Rennes correspondent of The Daily Telegraph said in part:

"There is reason to believe that Dreyfus is already out of prison."

PARIS, Sept. 20.—The pardoning of Captain Dreyfus does not drop the curtain on the drama. The Dreyfusards are determined to pursue the campaign against the generals and other officers of the general staff who have lied and committed gross illegalities in order to keep the prison door closed on the victim.

The campaign for his release has given the Socialist party a weapon of which they will avail themselves to the utmost, and Dreyfusism will be extended more into socialistic agitation. Moreover, the Zola trial and Mme. Henry's prosecution of Joseph Reinach for defaming the memory of her husband will shortly come on, and they will be used by both sides as levers again to excite public feeling.

Pardoning Dreyfus, therefore, only closes one act of the drama, and France will probably again find herself in the throes of party passion before the Paris exposition opens its doors next May.

The council of ministers decided to pardon Dreyfus in principle. The pardon will take effect in a few days. Dreyfus has relinquished his appeal for a reversal of the judgment of the court-martial.

"In principle" is an idiom sometimes used in the semi-official announcements of forthcoming action. It seems to have but slight bearing on the matter except, perhaps, that it implies the fulfillment of various formalities before the pardon.

There is much remark here on the strange coincidence of the death of M. Scheurer-Kestner, the first champion of Dreyfus, and to whom Dreyfus will virtually owe his freedom, on the very day the cabinet decided to pardon the prisoner.

It is said that Dreyfus will be sent abroad before the promulgation of his pardon in order to avoid demonstration.

## GUERIN SURRENDERED.

Ignominiously Carried Off to Prison. French Troops Were Ready For an Assault.

PARIS, Sept. 20.—According to agreement M. Guerin has surrendered.

Precisely at the hour appointed a captain of the municipal guards rapped at the door of Fort Chabrol. There was a moment of expectation and then the door opened. M. Guerin calmly presented himself, meekly surrendered and was driven to the police depot in an open cab, seated beside the captain of the guards. His companions were allowed to go free.

Thus the six weeks' siege ended in sublimely ridiculous style.

The night was well chosen by the government, as the excitement over the capture of the fort would inevitably divert attention from the pardon extended to Dreyfus. The plan was to attack the building and arrest Guerin and his band. The government had given him until 4 o'clock to surrender and had a regular army to assault the fort if he refused. Troops, municipal guards, mounted and on foot, and policemen to the number of nearly 1,000, were dispatched to cordon all the streets within the radius of a quarter of a mile of Fort Chabrol.

The authorities had planned to flood Guerin's house with water.

### M. Scheurer-Kestner Dead.

PARIS, Sept. 20.—M. Scheurer-Kestner, the former vice president of the senate and champion of Dreyfus, is dead of typhoid fever.

### Admiral Montejó Put on Trial.

MADRID, Sept. 20.—The trial of Admiral Montejó, formerly chief in command of Spain's naval forces in the Philippines, who surrendered to Admiral Dewey after the destruction of the Spanish fleet in the battle of Cavite, began here. The prosecution demanded a sentence of imprisonment for life with dismissal from the service.

### Rev. Father Burke Dead.

SHAMOKIN, Pa., Sept. 20.—Rev. Father W. J. Burke of the Locust Gap Roman Catholic church died at the parsonage from heart failure. He was a graduate of St. Vincent's college, in Western Pennsylvania, and was ordained into the priesthood in 1886.

### To Argue in Behalf of Carter.

WASHINGTON, Sept. 20.—Wayne MacVeagh, counsel for Captain Carter of the engineer corps, reached Washington. In reply to questions, he said he would argue the case at the attorney general's convenience.

## YELLOW FEVER ALARMING.

About Thirty Cases a Day Developed at Key West—Mortality Low—New Case at New Orleans.

WASHINGTON, Sept. 20.—The yellow fever situation at Key West is regarded as grave. Since the first case was reported about three weeks ago the epidemic has been steadily growing until there are about 400 cases. New cases appeared at the rate of about 30 a day, but the mortality is low. Fifty-four cases and two deaths were reported for Sunday and Monday. Attendant Hall of the marine hospital staff developed the disease and he has been isolated. As Key West is situated below the frost line the epidemic will have to run its course. The marine hospital service has been directing its efforts to confining the epidemic to the island and has been rewarded with signal success.

Only one infected person is known to have escaped and he was discovered at Miami and isolated. He has since recovered.

The treatment of the cases in Key West is entirely under the supervision of the Florida state board of health. The marine hospital service is simply enforcing quarantine regulations with a view to preventing the spread of the disease.

One new case of fever was reported to the surgeon general from New Orleans.

### One Death; 31 New Cases.

KEY WEST, Sept. 20.—Thirty-one new cases of yellow fever were reported in 24 hours and one death.

## HANNA RETURNED HOME.

Talked on the Philippine War—Declared He Would Not Resign the Chairmanship.

CLEVELAND, Sept. 20.—Senator Hanna arrived home, and having made a brief visit to his office, went to his residence. Regarding the Philippine situation he had this to say:

"If some people believe that the mass of the people of the United States desire to give up what our soldiers and sailors fought for, they are much mistaken. Our soldiers are not now fighting the representative Filipinos, but the raffia of the islands. In good time they will be given a protective government with just as much independence as they can handle."

Asked whether he thought Roosevelt would be a candidate for the presidential nomination, he said:

"I cannot express my definite opinion now, but Hobart and McKinley are the logical candidates."

Senator Hanna said he had no intention of relinquishing the chairmanship of the Republican national executive committee before his term expires.

## AN IMPORTANT DECISION.

Judge Williams Holds Stockholders' Property May Be Attached to Enforce Statutory Liability.

COLUMBUS, Sept. 20.—Judge O. C. Williams of the chancery court in a decision held that attachment may be made on property of the stockholders of a company to enforce the statutory liability. The decision was rendered in overruling a motion by B. A. Hough and Henry W. Puhm, brokers of New York, who sought to dissolve an attachment suit brought against them by the Dayton Manufacturing company on the ground that they are non-residents of Ohio, and statutory liability is not a proper claim to be collected by attachment.

The decision of Judge Williams affects New York parties holding about \$3,000,000 of the stock of the old Columbus, Shawnee and Hocking Railroad company.

### TROUBLE IN THE AMALGAMATED.

Men Dissatisfied With Scale and May Be a Split.

YOUNGSTOWN, O., Sept. 20.—Dissatisfaction over wages among the Amalgamated Association of Iron, Steel and Tin workers may cause a split in that organization. The men are dissatisfied over the recent settlement of wages at the bi-monthly meeting of the representatives of the association, who decided to let wages remain as they are for the next two months. The puddlers claim the puddling rate should have been advanced from \$5 to \$6 and better.

Puddlers are talking of withdrawing from the association at once and there is to be a meeting of those interested in Pittsburgh next Saturday night, when 600 millworkers of the Amalgamated association will be present and discuss what action shall be taken.

### Want Hunter Removed.

NEW ORLEANS, Sept. 20.—American citizens in Central America have signed a "round robin" against United States Minister Hunter. They are especially enraged over his action in the Peas case.

### Detroit Reached La Guayra.

WASHINGTON, Sept. 20.—The cruiser Detroit reported her arrival at La Guayra, Venezuela, where she was sent to look after American interests.

## PROPOSAL OF REBELS.

Cabinet Officials Don't Expect Much to Result.

### ROOT IS NOT VERY SANGUINE.

The Rebels Proposed That a General Be Admitted Through Our Lines—The Request Granted—Also Offered to Send In American Prisoners.

WASHINGTON, Sept. 20.—Three members of the cabinet, alluding to General Otis's dispatch regarding a conference with the insurgents, agreed, after the meeting of the cabinet, during which the dispatch was considered, in expressing the opinion that too much significance should not be attached to Aguinaldo's proposal. Secretary Root himself said that so many similar conferences in the past had come to naught that he doubted very much whether this one meant anything toward the establishment of peace and good order in the islands.

The text of the dispatch as made public by the war department is as follows:

## ALMOST A CATASTROPHE.

Details of Sinking of U. S. Transport. Fine Discipline, but Poor Seamanship—Kindness of Japs.

YOKOHAMA, Sept. 8, via Victoria, B. C., Sept. 20.—Interesting details are at hand of the wreck of the American transport Morgan City, in the inland sea of Japan. It appears that it came very near being an appalling catastrophe. Striking upon a reef about 3 o'clock in the morning, the ship remained fast until daylight, when, by adopting the expedient of pushing the men alternately from one side to the other, the ship was rolled from the rocks into deep water, where she at once began to fill rapidly.

She headed for the shore of the island of Inoshima, several miles distant, sinking perceptibly with every yard of progress. She reached the beach barely a minute before otherwise going under. The discipline of the men was admirable, and all were gotten ashore in safety. The seamanship shown appears not to have been so admirable, as no precautions were taken to make the boat fast to the shore after beaching. Time was spent in removing stores, the transport lying very nearly bows under, but afloat in the after part. In the afternoon, without warning, she slid off the steep beach and sank in about six fathoms.

Almost instantly came aid from the Japanese authorities, the cruiser Yosehomo being at once dispatched and the Red Cross society sending an expedition. The troops are loud in their appreciation of Japanese kindness.

A pleasant episode of the shipwrecked men was the passing of the Empress of India, which stopped for some hours and proffered everything which could be done in the way of aid.

### LAUTERBACH AND MOSS.

They Had Several Rows When Former Was Before Mazet Committee.

NEW YORK, Sept. 20.—Edward Lauterbach, counsel for the Ramapo company, was on the stand before the Mazet committee. He was asked to tell whether the Ramapo stockholders had decided to submit a list of their names. Mr. Lauterbach stated that he had been instructed not to submit the list on any other terms than those previously named, which were that the names should not be made public.

Mr. Lauterbach and Mr. Moss had several wordy rows during the examination. The witness said he would much rather see a Tammany man elected mayor than a man who belonged to no organization. Later, he was given an opportunity to explain his "pro-Tammany" speech, as he called it. He said that his words merely expressed a preference for an organization nomination, even by a hostile organization, to a hybrid one.

Silas B. Dutcher, president of the Ramapo company, who was called to the stand, declared that he had no such documents as he had been called upon to produce before the committee. Mr. Dutcher declined to answer a number of questions put to him, and was unable to say where the books of the company were.

### ODD FELLOWS CHOSE RICHMOND.

Selected as Next Place of Meeting of Sovereign Grand Lodge.

DETROIT, Sept. 20.—The grand lodge of Ohio presented the sovereign grand lodge with a cane which has a strong sentimental interest for Odd Fellows. It belonged to Thomas Wiltie, founder of the order in this county.

Richmond was chosen as the place of meeting in 1900.

The Rebekah assembly tendered Grand Sire Pinkerton and the various department commanders a reception in Light Infantry armory.

Last night's feature was a reunion of past grand representatives. One of the speakers was J. C. Farnham of Ohio, who read an address on "Progressive Oddfellowship."

The I. O. O. F. International Press association elected Mrs. Eunice Melville of Indianapolis president and John Barlette of Concord secretary and treasurer.

### Blind Strikers Returned to Work.

PHILADELPHIA, Sept. 20.—After a strike lasting 16 weeks the blind broom-makers, who had not previously done so, returned to their work at the Pennsylvania Working Home for Blind Men. There were 59 of them, the other 59 having previously gone back. The blind men were granted an increase in wages. Superintendent Hall, whom they wanted discharged, is retained pending an investigation of the charges against him.

### Some Discharged, Others Arrested.

CARTERVILLE, Ill., Sept. 20.—Matters have been very quiet here. The coroner's jury is still in session and may be for two or three days yet. Company B of Newton arrived. About 50 Carterville people were summoned to Marion as witnesses in behalf of the 19 union miners under arrest there. After hearing a few witnesses all the prisoners were discharged. Deputy Sheriff Odum of Marion made nine arrests for complicity in the shooting Sunday.

### Soldier's Death Reported.

WASHINGTON, Sept. 20.—Gen. Brooke reported to the war department the death of Private Bob Roberts, Company M, Tenth cavalry, who was killed by a fall at Canto, Santiago, on the 16th inst.

## SALISBURY IS CALM.

Meanwhile Troops Are Rushing to South Africa.

### CABINET MEETING ON FRIDAY.

England's Quiet Attitude Considered In European Capitals as Being Assumed to Cause Delay Until Troops Arrive. Alarm in Natal Declared Unwarranted.

LONDON, Sept. 20.—Summonses were issued for a cabinet council, which, it is understood, will be held Friday. This is regarded as the result of the visit of the premier, Lord Salisbury, to the foreign office. Joseph Chamberlain, the secretary of state for the colonies, was present in the building at the same time, and as a private doorway connects the offices it was presumed that the summonses were the result of their joint deliberations.

The lack of all excitement in official circles bears evidence to the deliberate manner in which the highest officials are handling the crisis. Nor is it by any means certain that the cabinet council will adopt extreme measures, in spite of the uncompromising nature of the Boer reply.

This deliberation on the part of the government was interpreted, not only in London but in other European capitals, as a desire on the part of Great Britain to gain time while the transports with soldiers are hurrying to Cape Colony.

Even rumors of a movement of the Boers across the Natal border apparently fail to excite the military authorities here, who professed at least not to fear such a contingency for the present.

The royal West Sussex regiment left for Malta, where it will replace the First border regiment, which goes by the same steamer to Natal.

The British first class protected cruisers Terrible and Powerful were ordered to the Cape. They have reliefs on board capable of forming a naval brigade of 1,000 men.

The steamer Jelunga will take 500 troops bound for Natal today, and she will embark a rifle brigade at the island of Crete for the Cape.

According to a dispatch from Durban, Natal, the premier of the colony says that the alarm of the people of Natal at the unprotected conditions of the border towns is quite unwarranted, and that efforts to incite the Zulus failed.

The lull in the crisis gives opportunity for the continuance of unofficial negotiations. The government of the Netherlands is privately exerting its influence in favor of a pacific solution, and it is understood that President Kruger, through Dr. Leyds, the plenipotentiary of the South African republic to the European governments, has unofficially approached three powers with a view to their intervention.

Sir Alfred Milner has addressed further inquiries to President Steyn of the Orange Free State. Whatever the official attitude of the Orange Free State may be, the temper of its burghers, judging from numerous meetings held in Bloemfontein and elsewhere, is to assist the Transvaal actively.

The Free State commandant in Pretoria are discussing the position with the Transvaal commandant general, and the meeting of the Free State volksraad tomorrow will have an important influence on the situation.

A curious rumor is spreading in the lower ranks of the army that Great Britain will be involved with Afghanistan as well as the Transvaal.

The correspondent of The Daily Mail at Pietermaritzburg, Natal, telegraphs that the military authorities there have received a warning from Johannesburg that the Boers have purchased considerable quantities of cyanide of potassium for the purpose of poisoning the streams in the Transvaal likely to be used by British troops.

Other special dispatches report various details of preparations for war on both sides.

## PRIVATE HOON'S OFFENSE.

Forged Names to Petition Asking Otis to Allow Him to Pass Examination For Promotion.

WASHINGTON, Sept. 20.—Secretary Root sent the following letter to Governor Bushnell of Ohio:

"Your letter of Sept. 14 to the president, enclosing a letter from Lawrence F. Hoon, relating to his conviction by court-martial in the Philippine islands, has been referred to me for reply:

"I have the honor to inclose a copy of a dispatch from General Otis, by which you will see that the young man was regularly tried and convicted for attempting to secure promotion by means of a petition upon which he forged the names of six non-commissioned officers and privates of his company; that the trial was at the instance of his regimental commander, and that the sentence was approved by General Lawton."

## MEN'S, BOYS', CHILDRENS' Clothing.

HATS AND FURNISHINGS. A COMPLETE SHOWING.

Thursday and Friday, Sept. 21 and 22.

IN starting a season, which we certainly expect to eclipse any of its predecessors, it may be appropriate to explain our confidence and enthusiasm.

Every suit and top coat in our house this season <sup>HAS BEEN</sup> made to our order, every yard of cloth has been sponged, every garment has been cut, made, pressed by skilled Union Labor. Each individual article has been finished with the same degree of care, and upon the same scale of excellence as the best merchant tailoring.

Rip an Erlanger fall 1899 garment, you'll find the extra hair cloth, you'll discover additional stays, you'll recognize that the good points of reliable clothing are not all on the outside.

True the innovation is somewhat costly, for hair cloth, stays, stitching, labor are not furnished to us free, but the results are expected to justify the investment.

The superiority of our clothing must be appreciated, and constituency is bound to increase.

We back our confidence in our 1899 garments by offering

### ARE FOUR MONTHS LATE

Much Time Has Been Lost In Mill Construction.

### RAILROAD COMPANY AT FAULT

Said Extension Would Be Completed In August—County Superintendent Allison In Chester Yesterday—Another Slide at the Narrows Last Night.

The Chester Rolling Mill company are making all possible haste in the erection of their mill, but the officers are somewhat discouraged about having the mill in operation by the first of the year, as was expected when work was first started.

One of the officers of the company when seen this morning said: "No, we will be four months late in starting the mill. When we started work the railroad company said the extension would be completed by August, but they have failed to keep their promise. Four months' running now, the way business is, is worth a year's running when business is just ordinary. As it is at present we are losing money right along. We should be in operation now."

"We had a good offer from McDonald to locate there at the same time we were considering this site and were looking with favor upon it. Had we built then we would have been running by this time."

### ARE SATISFIED.

Railroad Company Make No Complaint About Court's Decisions.

Attorney Somerville, of Wheeling, during his recent visit to Chester said it would not be known definitely whether or not the property owners who had contested in court the condemnation of their property would appeal from the decisions of the commissioners until the fall term of the court opens. He thinks the decisions are satisfactory to the railroad company.

### ANOTHER SLIDE.

Much Earth Caved In at the Narrows During the Night.

The rain of yesterday caused about 300 tons of earth to cave in at the narrows during the night, and for several days the work of grading will be discontinued. A large force of men are now at work cleaning the roadway.

### Off to Conference.

Miss Crill, who had charge of the services at the Free Methodist church during the past year, will leave tomorrow for Apollo, where she will attend the annual conference. She spent today in the county calling on friends.

### Will Return to Work.

Daniel McBane, the laborer who was injured while at work at the mill yesterday, will return to the mill Monday. His injuries are not as serious as was first thought and he is getting along nicely.

### Another Suicide.

It was reported in Chester this morning that a man named Stewart had committed suicide in Cumberland last evening. No particulars of the affair are known.

### SOUTHSIDE NEWS.

Interesting News Notes About People and Things Across the Ohio.

John Shrader has sold in the neighborhood of 24 houses since the first of the year.

County Superintendent Allison was in Chester yesterday and during the afternoon made an address to the scholars of the Grant schools. He stated many new educational features had been added to the schools throughout the county.

A new force of laborers was put to work at the narrows this morning. Several Liverpool men are employed.

The Gypsies who arrived in Chester Monday night purchased a shantyboat yesterday and will go south on the next rise.

Henry Riley and Washington Johnson drove over the country yesterday and purchased cattle.

A barber shop has been opened on the county road.

There is no change in the condition of Miss Cunningham and Miss Jackson.

The Polish woman who lost her way while crossing from New Jersey to Mercer last week, arrived at the settlement last night. Upon her arrival the other women in the party served refreshments.

## DR. CRAWFORD HOME.

Returns From the Alliance Conference and Reports It Most Successful.

Rev. Clark Crawford, D. D., has returned from Alliance, where he has been attending the session of the East Ohio M. E. conference during the past week. He reports the meeting as one of the most successful conferences he has attended.

Upon Bishop Mallalien's suggestion October 4 will be observed throughout the conference as a day of special prayer.

The conference adopted resolutions favoring absolute prohibition of the liquor traffic, protesting against the army canteen, condemning the opinion of the attorney general that it was legal and calling upon President McKinley to suppress the sale of liquor in the army until the courts can pass upon the legality of it. A resolution protesting against the seating of Mormon Roberts, the polygamist congressman from Utah, was also passed.

The conference opposes any changes in conference boundaries and refused to approve the consolidation of Scio and Mt. Union colleges. East Liverpool was one of the cities inviting the conference in 1900, but Youngstown won unanimously.

### BROKE THE RECORD.

Conference Report on Benevolences Exceed That of Any Previous Year.

ALLIANCE, Sept. 19.—The report of collections for benevolences this year by the East Ohio M. E. conference are in excess of any previous year. For missions, \$20,000, an increase of \$5,141 over last year; Church Extension society, \$2,087; Bible society, \$805; Episcopal fund, \$624; educational fund, \$1,200; Children's day, \$1,529, making a grand total for all benevolences the sum of \$20,559, the largest amount ever given in any one year.

### A LIBRARY

Of 200 Volumes Presented to Second Presbyterian Sunday School by E. D. Moore.

Sunday morning Mr. E. D. Moore presented to the Sunday school of the Second Presbyterian church a library of nearly 200 volumes of excellent books. Mr. Moore was formerly superintendent of the school, and he has the hearty thanks of the Sunday school and church, who highly appreciate his gift.

### East Liverpool Horses at Salem.

East Liverpool horses will be well represented at the Salem races as H. S. R., Brownie H., Colonel Breckenridge and Chicago Boy, all local horses, will start. In addition to these Russell Wilkes, formerly owned by Philip Morley, and Egremont, owned by Dr. Wanhaker, have been entered.

### The Elks' Picnic.

The Elks' picnic held yesterday at Rock Spring was very largely attended considering the inclement weather, and those present thoroughly enjoyed themselves, the affair being one of the most pleasant of the season.

## THE EAST END.

### OPERATION ON HIS EYE

William Chambers Injured at the Klondike Pottery.

### SEVERAL MEETINGS TO BE HELD

Alfred Marsh May Get His Money Back Rally Day at Second U. P. Church Next Sunday—Motormen to Hold an Important Meeting.

William Chambers, of North avenue, while at work in the Klondike pottery Monday repairing some tools, was injured in the left eye by a piece of steel. The eye commenced to swell and the man was taken to his home. Yesterday an operation was found to be necessary. He will be unable to resume his work for several days as he cannot see from that eye.

### AFTER HIS MONEY.

Alfred Marsh Has a Suspicion as to Who Robbed Him.

Yesterday a reporter saw Alfred Marsh, of Maple street, who was relieved of \$28 last week and when asked if he had a clue to the parties who took his money said:

"The crowd of boys that were loitering about the street on that day are known and it is probable that something may turn up within a few days. We have been keeping our eyes open and I have not given up hope of securing the money."

### REVIVAL MEETINGS.

All East End Churches Will Hold a Series of Special Meetings.

Every church in East End during the winter will hold revival services and it is thought by many that the first to be held will be in the Second M. E. church early in December. Very little attention has been given to the matter by the Presbyterian churches but Reverend Crowe and Reverend Greene have said meetings in their churches would be held during the holidays.

### RALLY DAY.

Sunday School Will Render a Fine Program Next Sunday Morning.

At the Second U. P. church next Sunday morning the annual rally day service will be observed. A special program of music has been arranged and among the speakers will be a number of Sunday school teachers. An address will be made by Rev. J. R. Greene. There will be no Sunday school service, it and the regular church service being combined.

### Could Not Stand the Climate.

Louis Farmer, of Middleport, who has been employed as a bricklayer on the new Laughlin pottery since June, returned to his home yesterday. He has not been well since he struck the town and to a reporter said he was glad to get out of it.

### Motormen Will Meet.

The motormen and conductors of the street railway line will hold their regular monthly meeting one week from next Saturday night. Some important business will be acted upon.

### This Is Hard Luck.

Yesterday morning Alfred McKinnon and Charles Sawers went hunting in the woods back of East End. They returned in the evening with only one small ground squirrel.

### Purchased Extinguishers.

The board of trustees of the Second U. P. church purchased several extinguishers at their recent meeting and they are expected to be placed in the church next week.

### Personal.

Miss Jennie Boyce, of Apollo, who has been a guest of her sister, Mrs. William Terrence, of First avenue, for several weeks, returned to her home yesterday.

### Will Resume Monday.

Owing to the inability to get the new boilers and brick machines in place the brick works did not start this week. Monday is now set for starting.

### Robbing Grape Vines.

A number of small boys entered the yard of Lincoln Harker Monday night and stole a quantity of grapes. The police are now after them.

### NOTICE.

Water consumers will make note that the fire plugs will be cleaned Wednesday and Thursday of this week.

## SADDEST CRY IN THE WORLD

Is the Cry of the Unemployed:  
"Out of a Job."

## OVERPRODUCTION AND WASTE

A Startling Statement, Backed by Official  
Facts and Figures--The World Owe  
Every Man a Job and the Leader of the  
Rochester Movement Shows How It Can  
Be Got.

The saddest cry the world around is  
the cry of the unemployed.  
What shall be done with the man who  
wants work, but can't get it?  
Shall he starve, steal, beg or go to the  
poorhouse? Neither.  
He is too proud to beg, too honest to  
steal, too good to starve and God placed  
him in a world of plenty and never in-  
tended him to eat the bread of a pauper.  
There is only one thing to do with the  
man out of a job.  
Give him work.  
The right to work is as sacred as the  
right to life.  
What is "life, liberty and the pursuit  
of happiness" to a starving man?  
A man with a family depending upon  
the strength of his arm, hunting in  
vain for a chance to work, impeaches  
our civilization.  
Society owes to every man a job.  
One way to discharge this debt is by  
preventing waste.  
Money spent for that which does not  
preserve health, give strength, prolong  
life, or in any way help to perform la-  
bor, that is waste.  
If, on the other hand, that for which  
money is spent is an injury to the pub-

lic health, shortens life, creates weak-  
ness, disorder and crime; and curses  
labor by lessening the demand for the  
products of his hand--then it is worse  
than wasted.

**The Curse of Labor.**  
"The curse of labor is overproduc-  
tion."  
That is not true,  
There is no such thing as overproduc-  
tion with a million human needs un-  
supplied.

No overproduction of shoes with chil-  
dren's feet bare; no overproduction of  
furniture with unfurnished homes; no  
overproduction of carpets with bare  
floors.

The three million and a half dollars  
being spent in the saloons of Rochester  
this year is wasted. Applying the test  
in paragraph two it is worse than  
wasted.

Suppose one million dollars of that  
money was spent for clothing; you  
would hear nothing more of overproduc-  
tion in clothing.

Suppose a half million more was spent  
for shoes, another half million for dry  
goods, another half million for furni-  
ture, etc., you would hear nothing more  
of overproduction in those lines of in-  
dustry.

And one thing more you would not  
hear of--an overproduction of men.

We don't have to go outside of Ro-  
chester to prove that.

According to the U. S. Census Bureau  
Report, the breweries of Rochester  
have \$6,455,000 capital invested, they  
pay \$381,000 in wages and employ  
434 hands. The men's clothing indus-  
try, with \$300,000 less capital invested,  
pay \$1,561,000 in wages and employ 3,132  
hands.

The boot and shoe industry in Roch-  
ester, with \$3,281,000 capital invested,  
about one-half the amount invested in  
breweries, pay \$2,031,000 in wages and  
employ 4,868 hands.

This is how they size

	Dollars Invested.	Men Employ'd.	Wages Paid.
Breweries .....	\$6,455,000	434	\$ 381,000
Clothing .....	6,150,000	3,132	1,561,000
Boots and shoes..	3,281,000	4,868	2,031,000

One-half the investment in the shoe  
industry employs eleven times as many  
hands and pays five times as much in  
wages as the beer industry.

The same investment that gives em-  
ployment to 434 men in the breweries of  
Rochester would give employment to  
9,736 hands if it was invested in making  
shoes.

The picture frame factories of Roch-  
ester, with thirty-two times less capital  
invested, employs 24 more hands than  
the breweries, and with the same amount  
of money invested would employ 13,000  
help.

Apply these facts to the country at  
large; divide the money now spent in  
the saloons among the twenty leading  
necessaries of life, and it would require  
four hundred million dollars more raw  
material than is now used in the manu-  
facture of drink to manufacture them  
and give employment to 1,347,000 more  
men.

Spend it that way for two years and  
we will write another document on  
"What Shall Be Done With a Job That  
Wants a Man and Can't Get Him?"

And the only answer to that will be:  
Offer more wages.

Suppose that only one-half of the  
drink bill of the United States is paid  
by the workmen; in two years they  
spend more money over the bar than  
the entire production of gold in Cali-  
fornia since its discovery in 1849 up to  
the present time. Men, go dry for two  
years and you can buy the Klondike and  
have money to spare.

## DIRECTORS WILL HELP

Carry the Library Bond Issue  
Saturday.

## THEY TOOK DECISIVE ACTION

At a Meeting Last Night and It Will Not  
be Their Fault If There Is Not a Full  
Vote Out--What Prominent People  
Think of the Election.

There was a large attendance last  
evening at the meeting of the library  
directors and decisive action was taken  
towards carrying the bond issue Satur-  
day.

Messrs. Peach, Rayman and Logan  
were appointed a committee to wait  
upon Trades council this evening and  
solicit the aid of the council to secure a  
full vote on the bond issue Saturday.

Messrs. Rayman, Peach, Hanley,  
Bough and Brownfield were appointed  
to take charge of the advertising and  
they will meet late this afternoon to  
formulate plans to get the matter more  
fully before the people.

## WHAT THEY THINK.

The Views of Several Prominent  
People on the Bond  
Issue.

The NEWS REVIEW interviewed sev-  
eral people on the bond issue and their  
views are as follows.

George H. Owen: I think the bond  
issue will carry, certainly, but I think  
there will be some votes against it.

William Erlanger: We should most  
assuredly buy the site. If we ever want  
a library centrally located that is the  
place for it. I want the bond issue to  
carry.

Isaac W. Knowles: As a general  
thing I am opposed to putting the town  
in debt any more, but this issue should  
carry and I will vote for it. I would go  
that far in order to save that \$50,000.

James R. Hill: It is a good thing  
and the issue should carry.

Dr. W. A. Hobbs: I will vote for the  
bond issue and the proposition should  
pass.

J. W. Gipner: It should go through  
and I will vote for it. When a man  
donates \$50,000 to the city it is the duty  
of the community to do their part.

## BRADSHAW ESTATE.

Suit Against the Administrator  
to Recover on Two Promis-  
sory Notes.

LISBON, Sept. 20.--[Special]--Ida O.  
Bradshaw Reynolds, of Chicago, has  
brought suit against W. L. Smith, as  
administrator of the estate of Cynthia  
Bradshaw, asking a judgment upon two  
promissory notes, one of \$400 and one of  
\$362.15, with interest. She claims she  
has presented the notes to the adminis-  
trator for acknowledgment, and he has  
refused to recognize her claim.

David O'Handlon in the sum of \$38.40  
before Justice McLane, of East Liver-  
pool, and defendant has appealed.

## BACHELOR GIRLS

Gave a Very Successful Entertainment  
Last Evening.

The entertainment given by the  
Bachelor Girls last evening at the home  
of Miss Hattie Thomas was a financial  
and social success, nearly \$18 being  
made for the benefit of the hospital. An  
excellent program was rendered and  
Miss Blanche Bray sang several very  
pleasing selections. The next entertain-  
ment will be held in the Phoenix club  
rooms.

## The Ladder of Life Tonight.

"The Irish Hero," presented by The  
Ideals at the Grand last night, proved  
another good play presented in a care-  
ful and painstaking manner to the en-  
tire satisfaction of a large audience.  
The specialties were pleasing and the  
music by Howson's orchestra a big fea-  
ture. Tonight a scenic melodrama, "The  
Ladder of Life," will be given. The or-  
chestra will play a descriptive overture,  
"A Day With the Circus." The sale of  
seats indicates another crowded house.

## THE LIFE OF THE CITY

As It Pulses and Throbs In the Busy Potteries.

### NEWS OF THE CITY'S FACTORIES

Personal Paragraphs Pertaining to Pottery—Items of Interest Picked Up Around the Plants—Unabated Activity Reported Everywhere.

Rush of orders has caused the Sebring and Standard companies to work at night since Monday.

Cartwright's claim the only trouble at their plant is that of being unable to get their orders out on time. Every department is running to its full capacity. The same conditions exist at the plant of the French China company.

George Smith, of the Knowles, Taylor & Knowles pottery, who has been in the west for several weeks, has returned home.

Goodwin's will soon place a new dinner set on the market. It has been named the "Fortune."

Martin Thornberry, a glost kilnman at the Goodwin pottery, is working out his two weeks' notice. He will go to the new Salem pottery.

Allen Hargraves, a packer at Cartwright's, is helping the Globe packers for several days.

An additional kilnhand has been placed on at the Goodwin pottery.

The Wallace and Chetwynd Pottery company has increased its capital stock from \$150,000 to \$176,400.

A number of workmen in the river potteries will erect homes in Chester next spring.

The West End pottery is enjoying an excellent run on the Col. A. L. Hawkins plate.

Willard Morris has returned from a western trip in the interests of the Knowles, Taylor & Knowles company.

Julius Pointer, engineer at the Murphy pottery, has returned to work after spending a two weeks' vacation at Parkersburg with friends.

Lawrence Stevenson, formerly of the French China, is now at the McNicol pottery, having charge of the ware-house.

Charles Wolf, a saucer jiggerman at Sebring's, is confined to his home on account of rheumatism.

J. S. Dunlap, an inventor residing in Chicago, arrived in the city last evening and registered at the Thompson House. This morning he placed an order for 100 semi-vitreous porcelain pots to be used on his latest invention, the Dunlap coffee percolation. The order is a small one compared with those that will be placed in November.

Car shipments of ware since Monday have been made by the Knowles, Taylor & Knowles, McNicol, Thompson, Standard and Sebring companies. The cars were sent to the west and south.

John Barto, of the Liverpool pottery, who has been in Freedom for several days, has returned to work.

The East End Pottery now has a full crew at work in the kiln department. The scarcity of this kind of labor is being met by men coming from other pottery towns.

Harry Grosscross, of East Palestine, is now at the Diamond casting the cow creamer. The firm has had a phenomenal run on this little novelty. Thousands have been sold.

Gotham & Lockart have completed models for a new dinner and toilet set for the Ohio China company at East Palestine.

A run on novelties will soon be made by the Cartwright pottery.

Julius Levi, a New York buyer, has been spending several days in the city placing orders.

Cartwright's will ship a car to Birmingham, Ala., Friday. It is now being packed.

Moulds are now being made for a new dinner set to be made by the National pottery. It has not been named.

Luther Miller, of Troy, O., has taken a position in the office at the Sebring pottery.

The Diamond is having an excellent run on the Matchless dinner and Manhattan toilet sets.

## THE ALUM BAKING POWDERS.

Names of Some of Principal Brands Sold In This Vicinity.

The recent discussion in the papers of the effect upon the human system from food made with alum baking powders and the emphatic opinions that have been published from noted scientists to the effect that such powders render the food unwholesome, leading to grave disorders of the stomach, liver and heart, have caused numerous inquiries for the names of the various alum powders.

Information as to the list here given, has been obtained from the official report of the Ohio Food Commission, from State Chemist Huston, of Indiana (as to the Calumet baking powder), from the Agricultural Department chemist at Washington, and from other equally reliable authority.

In Minnesota and Wisconsin of such importance is the matter deemed that not only are the names of alum powders officially made public, but the legislatures of both states have provided that there shall be printed in plain type upon the labels of all packages of this class of powders the statement that they contain alum.

## DEMOCRACY'S LATEST TRANSPARENCY.

CHORUS (Bryan, Lentz and Altgeld)-----Here's a bogie for your life; watch as scare the voters."

In addition to these, it is learned that very many grocers are selling what they call their own private or special brands. These powders are put up for the grocer and his name put upon the labels by manufacturers of alum powders in Chicago, Cincinnati, St. Louis, and elsewhere. The manufacturers, it is said, find their efforts to market their goods in this way greatly aided by the ambition of the grocer to sell a powder with his own name upon the label, especially as he can make an abnormal profit upon it. Many grocers, doubtless, do not know that the powders they are thus pushing are detrimental to health and would be actually contraband in many sections if sold without disguise.

It is quite impossible to give the names of all the alum baking powders in the market. They are constantly appearing to all sorts of disguises and under all kinds of cognomens. They can be avoided, however, by the housekeeper who will bear in mind that all baking powders sold at twenty-five cents or less per pound are liable to contain alum, as pure cream of tartar powders cannot be produced at anything like this price.

### TO CLEVELAND.

Cleveland and Pittsburg May Run a Train to That Place on Sunday.

"Since the Sunday trains have been placed on the Cleveland and Pittsburg road they have been well patronized by residents of this city," said Agent Adam Hill this morning. "When the train was first run only two passenger coaches were on the train but now it requires three coaches to accommodate the patrons."

There is some talk of a Cleveland train being started, but how soon the company will start it is not known. The Cleveland train is being talked about along the main line but nothing definite has been given out about the future plans of the company.

## GOT THE WRONG GIRL

She Didn't Sweep Dust or Use a Broom,

BUT SHE DID THROW WATER

William E. Chambers Made a Complaint Against Sarah McCormick, and Officer White Served the Papers on Another McCormick Girl, Who Said She Had Trouble With the Wrights.

Family troubles were the whole thing before Mayor Bough yesterday, and he has not yet succeeded in straightening them out.

William E. Chambers filed an affidavit against Sarah McCormick for assault upon Mary Wright. The parties live in East End, and it was claimed that Mary was passing the McCormick residence when Sarah swept dust on her and hit her with the broom. Officer White was given the papers to serve, and going to the McCormick residence asked a girl if she had trouble with the Wright family. She replied that she had and she was told to appear at the mayor's office. When she arrived last evening it was discovered that she was not the girl wanted, as she didn't sweep any dust or use a broom, but that she had ducked a member of the Wright family with a pan of water some few days ago and she thought that was what Officer White wanted her for. She was told to go home and be good.

McILREE'S Wine of Cardui

It isn't necessary for a woman to give particulars. When she says she has "female troubles", other women know what that means. It means days and nights of endless suffering. It means headaches which no tongue can describe. It means that terrible bearing and dragging down in the lower abdomen. It means agonizing backache, and shoulder ache, and arm ache, and aches in the lower limbs. It means nerves on edge—the blues—despondency and loss of hope. It means debilitating drains that the doctors call leucorrhoea. It means martyrdom—sometimes even death seems preferable. And still Wine of Cardui will utterly put those diseases and pains to rout. It has cured thousands of cases when nothing else on earth would. To the budding woman, to the bride, to the wife, to the expectant mother, to those going through

## FRANCE AND HER FAIR.

### Effect of the Dreyfus Case on the Exposition.

### MANY HEBREWS REVENGEFUL.

Will France Be Able to Re-establish Herself in the Eyes of the World? American Exhibitors Disposed to Be Conservative.

The storm of public protest against the Dreyfus decision, which has swept over America with more force, perhaps, than anywhere else, aroused at first grave doubts in the minds of many who intended to visit or exhibit at the Paris exposition of 1900 whether they might not better reconsider their plans. On the part of exhibitors, says the New York Tribune, the question was doubly important. They asked themselves whether the outraged feelings which have been aroused all over the world by the iniquitous Dreyfus decision might not keep so many visitors away from the exposition that it would hardly be worth while to display their goods. They were also conjecturing whether a country which might possibly submit to having its temple of justice turned into a moral shambles by a clique of army generals would be able to guarantee the safety of the goods to be exhibited from the incendiarism of an always possible Paris mob.

Among the prospective American exhibitors are many Hebrew merchants and manufacturers, and some of them perhaps fear that so long as anti-Semitic hatred might influence France to the defeat of equity and honor and national dignity their lives and property might not be safe from actual violence should the mob leaders undertake for any sinister purpose to stir up the enmity of the riffraff of Paris against them. The question also arose, would any French judge of exhibits venture to award a prize to a Hebrew rival of a Gaelic exhibitor in a city whose dead walls are plastered with placards like these: "Down with the Jews!" "Buy nothing from a Jew!" "Spit on the Jews!" "Death to the Jews!"

Then, again, prospective exhibitors, who are not Hebrews, were worried at first by the knowledge that many Hebrews are determined fighters, full of grit and courage, and the fiercer the hatred of their grows and the more their enemies threaten, the more determined they would become to display their wares at that very exhibition and carry off as many prizes as possible. Therefore, it could be depended upon, they imagine, that some Hebrew would provide that identical form of provocation for the French Jew baiters which nervous exhibitors most dreaded, and if a Paris mob should once begin to vent its spite upon the exhibits of Hebrews, it would not stop to discriminate. Moreover, anarchists, who love destruction for destruction's sake, and form a large part of every Paris mob, might be expected to see that no discrimination was made, but that all they could reach mingled in one red ruin.

These are some of the uncomfortable thoughts which, when the Dreyfus verdict was first announced, disturbed the minds of many Americans who had already gone to considerable expense in preparing for the exhibition. One of the largest items of their expense, so far, has been the outlay for showcases. Many thousands of dollars have been already laid out in this way alone. No expense has been spared to make the showcases handsome, striking and especially adapted in their shape to display goods to the best advantage in the somewhat circumscribed space allotted for the exhibition purposes. Many Americans have caused special goods to be manufactured for the Paris World's fair, and to withdraw their exhibits now would entail a loss, but that loss at this early stage of the scheme would be light, they thought, compared with what might happen if a raging anti-Semitic mob should start a riot in Paris while the exhibition was going on and while the only force that could be trusted to maintain order was an army, some of whose generals were corrupt, and a police force that would allow a single Guerin to defy it and make a laughing stock of it before the whole world, for weeks and weeks together.

But cool reflection has led Americans to take a more hopeful view of the situation. They see that France has so much to lose by a failure of her exhibition and so much to gain in this and countless other ways by restoring justice to her proper pedestal and by humiliating those who would make a mock of her before the world that it seems to be impossible that she should not take the necessary steps to set herself right before all the civilized nations. The exhibition is still a considerable way off, and a few weeks, even a few days, may make an entire change in the fate of Dreyfus and the condition of his persecutors. If France does take steps toward that end, would exhibitors feel that the Paris fair

will still be a great success; and no longer will accrue to foreign exhibitors or visitors, no matter what their race or religion may be. Interviews with the agents of steamship companies show that they are already booking passengers for 1900 at a rate which threatens to make a big fleet of extra steamships necessary, and inquiry at the office of Commissioner General Peck shows that no exhibitor has given up his allotted space. The success of the fair is in France's own hands now, and Americans are hopeful that she will know how to preserve it.

## EXPOSITION EXCURSIONS

To Pittsburg via Pennsylvania Lines on Thursdays.

Excursion tickets to Pittsburg account the Exposition will be sold for regular trains via Pennsylvania lines on Thursdays, Sept. 7, 14, 21 and 28, and Oct. 5, 12 and 19, from Ashtabula, Erie, Massillon, New Philadelphia, Powhatan and intermediate ticket stations on the Fort Wayne route, and from Dennison, Cadiz, Wheeling, Washington, New Cumberland and intermediate ticket stations on the Pau Handle route.

The rate will be one fare for round trip, with 25 cents added for admission coupon to Exposition.

The return limit will cover three days including date on which ticket is purchased.

The Exposition of 1899 will be a marvel. Numerous special new attractions will be added to the principal features of former seasons. The music programs will be by the world's greatest musical organizations. Sousa and his famous band of 50 pieces will give afternoon and evening concerts from Sept. 6 to 19; Godfrey's British Guards Band, of London, England, will furnish music from Sept. 20 to Sept. 30; the celebrated New York Symphony Orchestra of 50 pieces, under the direction of Mr. Walter Damrosch, will entertain Exposition visitors with fine music from Oct. 2 to Oct. 14, and the famous Innes Band of 50 pieces will be the musical attraction from Oct. 16 to Oct. 21.

For rates, tickets, time of trains and other details about the reduced fares, please apply to the nearest ticket agent of the Pennsylvania lines.

### DEWEY RECEPTION EXCURSIONS.

Low Fares to New York and Washington via Pennsylvania Lines.

For the Admiral Dewey receptions at New York Sept. 29 and 30, and at Washington Oct. 2, special excursion tickets of the open form which does not require signature will be sold from principal stations on the Pennsylvania lines.

New York excursion tickets will be sold Sept. 26, 27 and 28, and will be good to return leaving New York or Washington not later than Oct. 4. They will be honored returning within their limit either via direct line or via Washington.

Washington excursion tickets will be sold Sept. 30 and Oct. 1, and will be good to return leaving Washington not later than Oct. 6.

For tickets, information about rates, time of through trains and other details, apply to nearest ticket agent of Pennsylvania lines.

### Vacation Trips.

The Pennsylvania lines extend direct to places of summer sojourn along the Atlantic Ocean. Atlantic City, Cape May, Asbury Park Long Branch and resorts on the New Jersey coast are seashore terminals of the Pennsylvania system. Newport, Narragansett and summer havens in New England are reached over the Pennsylvania route via New York. The Adirondacks, White Mountains, Catskills and mountain retreats of the east are also reached through New York. Resorts in the Alleghenies are located upon the Pennsylvania route and may be reached via Pittsburg without changing car. The Pennsylvania lines also lead to resorts in Michigan and the lake region through three gateways: Cleveland, Toledo and Fort Wayne. Full information about rates, through time of trains and the convenient manner in which summer resorts may be reached will be cheerfully furnished upon application to local passenger and ticket agents of the Pennsylvania lines, or by addressing J. K. Dillon, D. P. Agt., Pittsburg Pa.

### Special Excursion to Pittsburg Exposition

Saturday, Sept. 16.

\$1.55 round trip for non-transferable excursion tickets from East Liverpool via Pennsylvania lines regular trains, good returning until Monday, Sept. 18, inclusive. This fare includes admission to the exposition where visitors will see many new and novel features—marking progress of invention, expert manufacture, artistic designing, and attractive display of fruits and vegetables. FOOD FOR THE SOLDIERS

Government Sending Emergency Rations to the Philippines.

A LIGHT DIET IS DIRECTED.

Big Refrigerating Plant Is to Be Constructed at Manila—Ice For Uncle Sam's Troops—How Food Is Shipped to the Orient.

Just by way of experiment the war department is sending to Manila 25,000 pounds of a new kind of emergency ration. It is stuff that comes in one pound cans and is understood to be composed of meat and vegetables, desiccated so as to be extremely compact and highly condensed. When wanted for eating, it is crumbled in a pint of cold water and boiled five minutes, the result being a thick and nutritious porridge. The latter, when cold, may be sliced for frying, like mush. Professors Chittenden of Yale and Atwater of Wesleyan have analyzed the substance and commended it strongly.

Much meat being undesirable as food for troops in so torrid a climate as that of the Philippines, the subsistence bureau of the army is trying to introduce lighter articles of diet for consumption by Yankee soldiers in the eastern archipelago. Dried boneless codfish by the ton is being shipped from Boston to Manila, and pickled whitefish and other fishes in brine are being forwarded likewise, not to mention large quantities of canned salmon. These are furnished to the boys in "khaki" in place of beef or pork to a considerable extent, the daily allowance for one man being 14 ounces of codfish or 16 ounces of canned salmon or 18 ounces of pickled fish. Two ounces of prunes or dried apples or evaporated peaches are supplied also as part of the regular ration for health's sake.

The war department is most anxious to hurry up the building of the proposed refrigerating and ice-making plant at Manila, and everything will be done to hasten its construction. Too much emphasis cannot be laid on the importance of this enterprise in its reference to the health and welfare of the American troops, and great regret is felt that it is not already completed and in operation. A contract was awarded to a New York firm the other day for the ice-making machinery, which will be shipped to the Philippines as soon as it can be got ready. The structure that is to house it has not been begun as yet, but it will stand on the south side of the Pasig river, between the Espana bridge and the suspension bridge.

The plant will be on an immense scale, as may be judged from the fact that space will be provided for hanging 1,200 tons of beef and 200 tons of mutton. If desired, one-half of this vast quantity may be kept chilled, while the other half will be held frozen at 12 degrees Fahrenheit. The refrigeration will be accomplished in the ordinary manner, by the expansion of ammonia gas manufactured on the premises. Ice will be turned out at a wonderful rate—nearly 100,000 pounds every 24 hours, or more than two pounds per diem for every officer and man in the army. Imagine what a comfort it will be in that tropical climate! But the ice-making apparatus will occupy only a small part of the building, relatively speaking.

The building itself will be severely plain, being designed rather for utility than for architectural effect. Through it, from end to end, will run a driveway, with platforms on either side for loading wagons. On the left of this driveway, as one enters, will be a room 128 by 32 feet, to hold 50 tons of butter and 100 tons of bacon. The rest of the lower floor on that side will be occupied by four rooms equally large for beef. On the right hand side of the driveway will be offices, elevators, a great room for the storage of ice, the machine room and an ice-making room 100 feet square, the floor of which last will be composed of a series of long and narrow tanks, sheathed inside with iron plates and filled with filtered water. Behind the plates will run coils of pipes, through which expanding ammonia gas will flow, freezing the water in the tanks into solid blocks.

On the second floor of the building will be five huge rooms, four of them for beef and one for mutton, while the space over the driveway will be devoted to the storage of canned goods, potatoes and onions. In short, the building will be commodious enough to house provisions for the entire American army of 40,000 men—the number at present contemplated—in the Philippines. The quantity of beef mentioned will furnish no fewer than 2,016,000 full rations, allowing a pound and a quarter a day to each soldier, and will feed all the Yankee troops 50 days without renewing the supply. The mutton will yield 336,000 rations, or more than eight days' allowance. As for potatoes and onions, enough will be kept on hand to last the forces a week. Ordinarily each fighting man gets a pound of vegetables per diem, and of these potatoes and onions make up 70 per cent.

All of the fresh beef and fresh mutton for the troops in the Philippines

comes from Australia, whence it is brought to Manila in a frozen condition by steamers. There is now fitting out in New York a cold storage vessel, provided with everything that is the latest in the way of refrigerating apparatus, which will shortly proceed to the eastern seas and take up this business of meat transportation for the government, plying between the island continent and Luzon. Some of the potatoes and onions for the soldiers come from Australia also, though most of them are shipped from San Francisco. Pork, ham and bacon are furnished to the army by Chicago packers. Beans and peas are forwarded mainly from St. Louis and Chicago. In view of the importance of this military trade, lines of steamers are being established at New York to follow the route via the Suez canal.

It is likely that after our troops have been for a longer time in the newly acquired archipelago they will eat more rice than they do now. That cereal is grown in immense quantities in the neighborhood of Manila, the fields being under water in the rainy season, and it is specially in favor with people that inhabit tropical regions. Soldiers do not of necessity require meat to fight on, as is illustrated by the fact that when those husky warriors, the Scotch highlanders, invaded England each man of them carried on his back 50 pounds of oatmeal, which in camp he cooked in his own iron cap. If, by the way, our men knew how easily a palatable whisky, known in the east as "saki," or "rice brandy," could be distilled from rice with simple apparatus, there would probably be a good deal more drunkenness in the army. An advantage that rice has for army use is that it is a highly condensed food—a sort of natural emergency ration, extremely nutritious and portable in small bulk.

The new emergency food referred to, of which 25,000 one pound cans are on their way to Manila, is composed of such ingredients as to supply all the needs of the body. So, at all events, say Professors Atwater and Chittenden. It furnishes fuel to keep the fighting man a-going and "protein" to make blood and tissue. One can is a complete ration for one man for one day. To make it satisfactory in all respects each can contains, in addition to the food cake, a tablet of sweetened tea, guaranteed to make, with boiling water, four quarts of strong infusion. The soldier is expected to break it into four equal parts, thus providing himself a plentiful allowance of the cheering beverage four times a day.

"HELLO," SAID LILLIAN.

The Prima Donna Reminds Comedian Kelly of Old Days.

When Lillian Russell and John T. Kelly met for rehearsals of "The Whirligig" at Weber & Fields' Music hall in New York a few days ago, says The World, it was the first time they had come within speaking distance of each other in 15 years. Both were members of Tony Pastor's company at Pastor's old theater in the seventies.

Kelly was at a loss to know whether or not he ought to step up and greet the prima donna. He decided that he would and started forward. Then he changed his mind and stopped.

At that moment Miss Russell looked across the stage and saw him. She promptly marched forward and held out her hand.

"Hello, John!" she said. "Do you remember me?"

"Well, rather!" answered Kelly. "You didn't think I'd forgotten the days down at Pastor's, did you? You sang in the chorus, and I did Dick Deadeye in 'Pinafore.'"

"Kelly," said Miss Russell, "your memory is getting bad in your old age. We played together before that. See if you can't think when it was."

Kelly thought. Then he shook his head. "Can't recall it," he added.

"Why, yes. Don't you know? You did an afterpiece for the variety show, and my sister and I walked on and off in it to impersonate the crowd. That was in—let's see—no, I guess I won't say when. A woman is as old as she looks, you know."

PORTO RICO'S COFFEE.

The Tariff Modified to Help the Island Planters.

Secretary Root has directed an order providing that Porto Rico coffee be admitted duty free into Cuba. The secretary has refused to adopt the suggestion that the tobacco of Porto Rico be also admitted duty free into Cuba.

The secretary has taken this action in order to assist Porto Rican planters who suffered by the recent hurricane.

"The coffee industry," said Secretary Root, "is the most important in Porto Rico. The latest annual valuation of the Porto Rico crops is about \$18,000,000, and \$12,000,000 of this amount represents the coffee crop. About one-third of the coffee goes to Cuba, on which the tariff is \$12.50 per 100 kilograms, and the removal of this duty will be of material advantage to the Porto Rican planters.

"The free importation of tobacco into Cuba could not be granted. Tobacco is a Cuban crop, and, besides, a great many people have recently invested money in the tobacco industry in Cuba."

This modification of the tariff, Secretary Root says, applies only to Porto Rico and Cuba.

TRADE OF PHILIPPINES.

The Report of the British Consul at Manila.

GIVES SOME SIGNIFICANT FIGURES.

Exports From the Archipelago and the Countries to Which They Go. United States and Great Britain the Principal Markets.

The trade of the Philippines in 1898 is discussed by a report of the British consul at Manila, just received by the treasury bureau of statistics. He opens his report by saying: "Notwithstanding that for the moment all commercial enterprise is paralyzed there is abundant evidence that when peace and a settled form of government are well established the future prosperity of the Philippines will far exceed the past. The climate of Manila, as far as I have yet experienced it, is similar to all tropical climates, and the health of Europeans depends principally upon themselves. The town of Manila, which is of great extent, has the disadvantage of being only eight or ten feet above the sea level, and as the natives have hitherto been taught to regard all sanitary projects as useless there is heavy work in the task of draining, etc., and heavier still in persuading the Filipino that such measures are necessary."

Discussing the commerce of the Philippines, the report shows something of a falling off in the year 1898, due to the disturbed conditions, but shows the exports of sugar in 1898 to be 177,635 tons, against 202,092 in 1897, of which four-fifths were from the island of Iloilo, though in 1897 only about two-thirds of the sugar exports were from Iloilo. The exportation of hemp in 1898 falls but little below that of 1897, two-thirds of the amount being from the island of Iloilo and the remainder from Cebu.

The figures showing the exportation of sugar from Iloilo for a long term of years are interesting and suggestive. They show that the exportation of sugar from Iloilo in 1859 was 86,832 piculs (picul equals 133 1-3 pounds); in 1869, 117,508; in 1879, 762,004; in 1889, 1,792,119; in 1896, 1,994,378; in 1897, 2,088,672, and in 1898, 2,470,432.

Regarding trade prospects in the Philippines, the British vice consul at Iloilo, Mr. Fyfe, says: "The preferential tariff hitherto enjoyed by Spanish goods, and which was rapidly diverting this trade to Barcelona, being now abolished, competition from that quarter should scarcely be possible any longer. Notwithstanding the disturbed state of the country business has been well up to the average, several of the neighboring islands and provinces which have hitherto drawn their supplies from Manila having had to buy in this market during the blockade of the former port. Owing to the uncertainty of the future fresh arrivals of goods have been on a much reduced scale, so that stocks today in the importer's hands are exceptionally light. The import of petroleum this year has been very small, only 30,000 cases, 74,000 cases being the import in 1897. This is accounted for by the falling off in consumption among the principal classes on account of the high price and also on account of large stocks held over from the previous year. On account of the unsettled state of affairs in the whole group of the Philippine Islands the sale of new milling plant has been almost nothing."

That the Philippines are likely to become of much greater value with a diversification and development of industries along the lines suggested by the requirements of the markets of the temperate zones is indicated by Vice Consul Fyfe, who says:

"The final decision of the present crisis is now anxiously awaited, and time will show if these rich islands do not in the future produce many other products which have never been developed or cultivated." This suggestion is especially interesting taken in connection with a single item in the table of the principal exports of the Philippines given below. This item is indigo, and while it shows a comparatively small exportation of this article, 66,584 pounds in 1897, it suggests the possibilities as to an increase in the production of an article whose export value from India has for years ranged from \$6,000,000 upward.

The following tables from the report of the British consul show the principal exports of 1897 and 1898 and their destination:

"Doctors failed to reach my case and advised me to try a higher air."

There is no greater irony than a recommendation of change of climate to those whose circumstances make change of climate impossible. How many a sufferer in such a case has wistfully watched the flight of the south-seeking birds, and cried with the Psalmist, "Oh that I had wings." But suppose you can fit the lungs to the climate instead of fitting the climate to the lungs. That is what has been found possible by those who have used Dr. Pierce's Golden Medical Discovery. It so purifies the blood, removing the clogged and poisonous conditions favorable to disease, that the whole body is strengthened. With new strength comes new power, and disease is resisted and thrown off.

There is no alcohol, whisky or other intoxicant contained in

Dr. Pierce's Golden Medical Discovery.

"I feel that I owe a debt of gratitude to you for preparing such grand remedies, for chronic diseases especially, which the doctors failed to reach," writes I. B. Staples, Esq., of Barclay, Osage Co., Kans. "I am a railroad agent, and four years ago my work keeping me in a warm room and stepping out frequently into the cold air gave me bronchitis, which became chronic and deep seated. Doctors failed to reach my case and advised me to try a higher air, but, fortunately for me, a friend also advised me to try Dr. Pierce's medicines. I commenced taking your 'Golden Medical Discovery,' and by the time I had taken the first bottle I was better, and after taking about four bottles my cough was entirely gone. This was a year ago last winter; and again last winter I took about three bottles to prevent a return of the trouble. I have found no necessity for seeking another climate."

Dr. Pierce's Pleasant Pellets are powerful aids to the cleansing of the clogged system. By all dealers in medicine.

EVERY WOMAN Sometimes needs a reliable monthly regulating medicine. DR. PEAL'S PENNYROYAL PILLS, Are prompt, safe and certain in result. The genuine (Dr. Peal's) never disappoint. Sent anywhere, \$1.00. For sale by C. G. Anderson, Druggist.

Mohammedanism in British Africa.

Reports from British West Africa are to the effect that the natives are rapidly becoming converts to the faith of Islam, while Christianity is making small progress. The British colonial office reports that this change in faith has a splendid influence on the natives. Drunkenness is on the decrease, and there is great improvement in other directions.

Novel Cure For Inebriety.

Recently the Indians on the Jackson county reservation, in Kansas, engaged in their annual green corn dance, a ceremonial that is religious in its character, so, among other prohibitions, drunkenness is not allowed. However, one of the bucks tried to get on the pavilion at one of the services when he was plainly not in a fit condition. He was ordered away, but would not go, whereupon he was taken in charge by a couple of guards, who applied a new kind of cure for drunkenness that was rough but efficacious. His hands were tied behind him, his legs tied together and then pulled up behind him until they reached his hands, and they were all tied together. He was then carried to the shade of a tree, where he was thrown to the ground like a stick of wood and left to lie there until he could sober up and learn something in the bargain. When his hands were untied he was as decent as could be. A few such treatments usually cure the worst cases, and they don't disturb the dancers any more.

It Has Been Noticed.

"There's a rather queer thing that I have noticed about people who follow the profession of letters."

"What's that?"

"The man who writes just to keep the pot boiling is not the one who produces the hottest stuff."—Chicago Times-Herald.

Dean Swift, when invited to dinner by his friend, Lord Bolingbroke, was shown the dinner bill as an inducement to accept and replied, "A fig for your bill of fare; show me your bill of company."

For the first time in years, the Democratic party had a real issue in 1896. And it still hangs to free silver, though it has been dead nearly three years.

## EGRET FARM PROJECTED.

Arizona Man Will Raise Birds For Their Feathers.

A. Bienkowski of Yuma, A. T., has evolved a new scheme whereby he may corral the elusive dollars. He proposes to start an egret farm and conduct the same on the principle of an ostrich farm, says the Yuma Sentinel. The egret is a tropical bird of the heron family and is found in great abundance at the mouth of the Colorado river. It has a white crest, the feathers of which are valued at \$32 an ounce. It has been figured out that 20 birds will yield an ounce of feathers twice a year, or ten birds will yield an ounce of feathers every year, which would be \$32 a year for ten birds.

The birds have been and are being killed for their feathers, and as a consequence they will soon be extinct. Bienkowski proposes to fence 150 acres of marshy land along the river bottom near Yuma and domesticate the egret. He thinks this could be done by clipping their wings. He has several birds in his possession now, and they seem to stand captivity well and are easily tamed. The scheme is feasible.

## Schley's Assignment Important.

WASHINGTON, Sept. 30.—Rear Admiral Wm. L. Scott Schley will succeed Rear Admiral Howison in command of the South Atlantic station. He called upon the president and told him that he had no complaint to make. To the rear admiral's friends the president has said that he regards the station as of great importance, especially at this time, in view of the situation in South Africa and the unsettled condition of affairs in some of the South American countries. The president told Admiral Schley's friends he regarded it as a mark of distinction. Besides, he said it was the only way to gratify the admiral's desire for sea service. It is probable that some additional ships will be assigned to the squadron.

## Pennsylvania Jr. O. U. A. M.

SCRANTON, Pa., Sept. 20.—The state council of the Junior Order United American Mechanics opened its fortieth annual convention here. Councillor Bowers' report called attention particularly to the efforts and methods to increase the membership. Secretary Deemer's report showed that five new councils were instituted and nine reinstated during the year ending Aug. 31, that there were now 750 councils with a membership of 79,396, an increase of 2,675. During the year the state council received \$44,597.07. The receipts of the subordinate councils were \$707,603.87; they have \$925,773.88 invested and \$167,191.50 in their treasury, while \$291,089.65 was paid out for relief and funeral benefits. State Treasurer Calver's report showed a balance of \$5,982.52 in the treasury of the state council.

## Satisfactory Test of Armor.

WASHINGTON, Sept. 20.—A number of Russian and American naval officers went to the Indianhead proving grounds to witness the test of Krupp armor plate, representing a large quantity of the armor of the Russian battleship now building at the Cramp yards in Philadelphia. Admiral O'Neill's observations were with a view to presenting the matter to congress in connection with the question of furnishing armor for the new United States battleships and armored cruisers. The officials of both countries regarded the test as highly satisfactory.

## Successors to Cornelius Vanderbilt.
